内容概要

Book Description

Which is more dangerous, a gun or a swimming pool?

What do schoolteachers and sumo wrestlers have in common?

Why do drug dealers still live with their mums?

How much do parents really matter?

These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He is a much-heralded scholar who studies the stuff and riddles of everyday life - from cheating and crime to sports and child rearing - and whose conclusions regularly turn the conventional wisdom on its head. He usually begins with a mountain of data and a simple, unasked question. Some of these questions concern life-and-death issues; others have an admittedly freakish quality. Thus the new field of study contained in this book: Freakonomics

From Economist

The book is a delight... It shows what plain old-fashioned economics can do in the hands of a boundlessly curious and superly skilled practitioner... Ingenious.

About Author

Steve D. Levitt teaches economics at the University of Chicago. He recently received the John Bates Clark Medal, awarded every two years to the best American economist under forty.

Stephen J. Dubner lives in New York City. He writes for The New York Times and The New Yorker and is the bestselling author of Turbulent Souls and Confessions of a Hero-Worshiper .
