<<Short calculus简明微积 >

图书基本信息

书名: <<Short calculus简明微积分>>

13位ISBN编号: 9780387953274

10位ISBN编号: 0387953272

出版时间:2001-11

作者: Lang, Serge

页数:257

版权说明:本站所提供下载的PDF图书仅提供预览和简介,请支持正版图书。

<<Short calculus简明微积 >

内容概要

This is a reprint of A First Course in Calculus, which has gone through five editions since the early sixties. It covers all the topics traditionally taught in the first-year calculus sequence in a brief and elementary fashion. As sociological and educational conditions have evolved in various ways over the past four decades, it has been found worthwhile to make the original edition available again. The audience consists of those taking the first calculus course, in high school or college. The approach is the one which was successful decades ago, involving clarity, and adjusted to a time when the students¿ background was not as substantial as it might be. We are now back to those times, so it¿s time to start over again. There are no epsilon-deltas, but this does not imply that the book is not rigorous. Lang learned this attitude from Emil Artin, around 1950.
