

<<精通医学>>

图书基本信息

书名：<<精通医学>>

13位ISBN编号：9780443056932

10位ISBN编号：0443056935

出版时间：1999-9

出版时间：Oversea Publishing House

作者：Alexander C. Brownie 著

页数：288

内容概要

This series of books reflects the trend towards a core curriculum and self-directed learning. The content is restricted to the 'must know' core information presented in a synoptic style. The diagrams that support the text are in a style that the reader can remember and reproduce in examinations. Each chapter ends with a selection of self-assessment material and full explanatory answers. These consolidate and expand on the chapter contents. The series covers the entire curriculum in approximately twelve discipline-based volumes. This volume presents an integrated coverage of biochemistry. Despite the use of problem- and/or topic-based curricula students still respond to the security of a well-ordered presentation of the basic information by traditional discipline. Concise text of the essential core material. Accompanying self-assessment material ideal for self-directed learning. Simple line drawings of a style that can be easily reproduced in examinations. New smaller format to fit on bookshop shelves. New internal design to look more up to date. Much stronger series cover design to encourage bookshops to display as a series. Increased self-assessment. Includes the new OSCEs style questions that are increasingly used in examinations. More consistent use of learning objectives. Contents refined to take account of comments on first edition.

书籍目录

Using this book1. Biochemistry and medicine2. Molecules in cells and water3. Proteins4. Enzymes5. Cell membranes6. Gas transport by the blood7. Carbohydrate and fat catabolism8. Other pathways of carbohydrate metabolism9. Protein and amino acid metabolism10. Lipid synthesis and transport11. Integration of metabolism12. Purines and pyrimidine nucleotides13. DNA structure and function14. RNA structure and function15. The synthesis of proteins16. Molecular aspects of viruses17. Biochemical functions of the liver18. The biochemistry of the endocrine system19. Nutrition20. Biochemical functions of the blood21. Biochemical genetics and inborn errors of metabolismIndex
