Jayaram Kondabagil, has produced an excellent work which will be the key reference for -- Mark Mobius, Managing Director, Templeton Asset Management anyone involved in electronic banking." "Risk Management in Electronic Banking is written in a simple and easy to understand style and it Ltd provides a broad overview of electronic banking. It also highlights the importance of risk management and addresses a gap in extant literature on the subject. Aimed at a global audience, the consolidated checklist at the end of the book is useful and a notable feature is that it also includes outsourcing risks, which though of recent origin has already made a big impact in financial services sector.
