<<室内时尚设计 Fashion Retail>>

内容概要

When it comes to architecture and design, one area in which there has been a huge amount of popular interest is that of interiors. Yet, surprisingly little has been published in the area of fashion, despite the fact that today many top fashion houses are choosing to collaborate with leading architects and designers, with the aim of creating a unique brand. From unique boutique-chic to department stores, this book showcases around 30 of the most successful and inspiring collaborations around the world. The breath-taking results are laid out over more than 300 full colour photographs, which are accompanied by simple captions. Cases studies include: Prada, Stella McCartney, Herm é s, Emporio Armani, Louis Vuitton, Burberry, Giorgio Armani, Paul Smith, Jill Sander, Issey Miyake, Dolce and Gabbana, Martine Sitbon, Fendi, Oki-ni, Missoni, Gianfranco Ferr é , Comme des Gar¸ons, Nicole Farhi, Marni, Harvey Nichols, Chloe, Selfridges, Alexander McQueen, Marks and Spencer.
