<<亚太地区固定收入市场>>

内容概要

As stability has begun to return to the Asia-Pacific region, so do international investors' appetites for high-yielding Asian securities. Right now, due to the substantial bank debt accrued during the last financial crisis there, the liveliest investment areas in the Asian-Pacific region are fixed income instruments. Authors Jonathan A. Batten and Thomas A. Fetherston provide country-by-country analyses, including highly-focused descriptions of the history, current disposition, and future prospects of each country's bond markets, along with detailed explanations of the market structure and conventions in each. Jonathan Batten is a Professor of Finance at Deakin University. His professional experience includes senior posts at the Australian Industry Development Corporation, The Bank of Tokyo, Credit Lyonnais and IBM Consulting in their Asia-Pacific Banking and Finance Group.
