<<静脉介入放射学>>

内容概要

the three years since publication of the first edition, venous interventions have increased to the point that they now constitute up to 75% of a typical day's procedures in most vascular and interventional radiology practices. These procedures are extremely important to the interventionalist, vascular surgeon, internist, payer, and of course, to the patient, who depends on them being performed with skill and care. In this book, you have at your fingertips the most comprehensive, thorough and systematic approach to venous interventional radiology available today. The second edition has been fully updated and expanded by 14 chapters and includes many more clinical correlations. You will find full coverage of underlying concepts, techniques and procedures, including: "Hot" venous topics such as peripheral venous thrombolysis for deep vein thrombosis, treatment of failing and failed hemodialysis access, placement and management of ports, diagnosis and intervention for thromboembolic disease, and the use of temporary inferior vena cava filters. The all important clinical perspective, covering not only the disease process, but also the patient workup, outcome analysis, indications, contraindications, risks and cost effectiveness of each procedure. An important chapter on surgical options added to the chapter on chronic venous insufficiency. Hundreds of clear illustrations and photographs that highlight every topic.

书籍目录

Foreword by GaryJ. BeckerPreface to First EditionPrefaceAcknowledgmentsContributorsSECTION 1 Portal Hypertension Chapter 1 Etiology Chapter 2 Angiographic, Venographic, and Hemodynamic Evaluation of Portal Hypertension Chapter 3 Coronary Vein Embolization Chapter 4 Transjugular Intrahepatic Portosystemic Shunts (TIPS) Chapter 5 TIPS: Randomized Trials and Basic Research Chapter 6 Improved TIPS Patency with Covered Stents Chapter 7 The Budd-Chiari Syndrome Chapter 8 Percutaneous Intervention of Malfunctioning Surgical Portosystemic Shunts Chapter 9 A Surgeon's Perspective on the Role of Interventional Radiology in the Management of Portal Hypertension Chapter 10 Portal Hypertension: Complications and Medical Management from a Gastroenterologist's PerspectiveSECTION 2 Venous Embolization Chapter 11 Pulmonary Arteriovenous Malformations Chapter 12 PAVMs: A Pulmonologist's Perspective Chapter 13 Diagnosis and Management of Venous Malformations Chapter 14 Testicular Varicoceles Chapter 15 Ovarian and Pelvic Varices in the Female Patient Chapter 16 Varicoceles: A Pediatric Urologist's PerspectiveSECTION 3 Hemodialysis Access Management Chapter 17 Hemodialysis Vascular Access: A Transplant Surgeon's Perspective Chapter 18 Physical Examination of Hemodialysis Access Chapter 19 Treatment of the Failing Hemodialysis Graft Chapter 20 Treatment of the Thrombosed Hemodialysis Graft Chapter 21 Percutaneous Radiologic Approach to Management of the Native Dialysis FistulaSECTION 4 Chronic Infusion CathetersSECTION 5 Central Venous Stenosis and OcclusionSECTION 6 Venous Thromboembolic DiseaseSECTION 7 Inferior Vena Cava FiltersSECTION 8 Chronic Venous InsufficiencySECTION 9 Venous SamplingSECTION 10 Foreign Body Retrieval and Central Venous Catheter Repositioning TechniquesIndex
