

<<基础免疫学更新版2006-2007>>

图书基本信息

书名：<<基础免疫学更新版2006-2007>>

13位ISBN编号：9781416029748

10位ISBN编号：1416029745

出版时间：2006-2

出版时间：Elsevier Science Health Science div

作者：Abbas, Abul K./ Lichtman, Andrew H.

页数：324

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

The Updated 2nd Edition of this popular text emphasizes the fundamental concepts and principles of human immunology that students need to know, without overwhelming them with extraneous material. It leads the reader to a firm understanding of basic principles, using full-color illustrations; short, easy-to-read chapters; color tables that summarize key information clinical cases; and much more all in a conveniently sized volume that's easy to carry. Presents all of the most important principles that govern the function of the immune system.

Extrapolates key concepts from the vast amount of experimental data that has emerged. Focuses on the cellular interactions in immune responses rather than describing in detail many of the underlying biochemical and molecular mechanisms. Emphasizes immune responses in human rather than experimental animals, drawing upon parallels with experimental situations only when necessary. Uses clear, crisp illustrations, diagrams, figures, charts and tables to highlight important principles. Illustrates how the principles of immunology may be applied to common human diseases through clinical cases in the Appendix. Features an easy-to-read layout; summarizes chapter content in bulleted lists accompanied by review questions; and offers a list of selected readings. Includes access to www.studentconsult.com, an innovative website that allows you to build a personalized, fully integrated, online library, where you'll find... The entire contents of every STUDENT CONSULT title you purchase. Integration links to bonus content in other STUDENT CONSULT titles.

Powerful search capabilities- View all excerpts relevant to keyword or subject searches (up to 300 words per hit) from every book in the series. Image library POCKETConsult- Download portions of your personal library onto your handheld. Student resources- Sharpen your skills, stay informed, and have fun! More!

书籍目录

1 Introduction to the Immune System The Nomenclature, General Properties, and Components of the Immune System
2 Innate Immunity The Early Defense Against Infections
3 Antigen Capture Lymphocytes What Lymphocytes and Presentation to See
4 Antigen Recognition in the Adaptive Immune System Structure of Lymphocyte Antigen Receptors and the Development of Immune Repertoires
5 Cell-Mediated Immune Responses Activation of T Lymphocytes by Cell-Associated Microbes
6 Effector Mechanisms of Cell-Mediated Immunity Eradication of Intracellular Microbes
7 Humoral Immune Responses Activation of B Lymphocytes and Production of Antibodies
8 Effector Mechanisms of Humoral Immunity The Elimination of Extracellular Microbes and Toxins
9 Immunologic Tolerance and Autoimmunity Self-Nonself Discrimination in the Immune System and Its Failure
10 Immune Responses Against Tumors and Transplants Immunity to Noninfectious Transformed and Foreign Cells
11 Hypersensitivity Diseases Disorders Caused by Immune Responses
12 Congenital and Acquired Immunodeficiencies Diseases Caused by Defective Responses Suggested Readings
APPENDIX I Principal Features of CD Molecules
APPENDIX II Glossary
APPENDIX III Clinical Cases
Index
