<<手部病例精粹Hand Pearls>>

内容概要

65 detailed case studies from the authors' practices challenge the reader with a patient description, a figure as a clue to the problem, and a question. Subsequent pages reveal the answer and offer an in-depth discussion of the case, as well as Clinical Pearls summarizing key points and a few current references. Heavily illustrated with the highest quality photographs, radiographs, and MRI and CT scans. Applies an efficient problem-solving, self-study approach. Reviews key elements of clinical evaluation and rational management not readily available in standard textbooks. Each case finishes with a description of the presented patient's treatment, course, and outcome. Includes several color panels. 17th book in The Pearls Series; of case studies; highly successful texts covering, e.g., infectious disease, rheumatology, urology, sleep medicine, cardiology, neurology, dermatology, and internal medicine.

书籍目录

Patient 1. An 83-year-old woman with scleroderma and longstanding lesions on her hands 2. A 37-year-old woman with longstanding "bent fingers" 3. A 43-year-old man with finger numbness and hand clumsiness 4. A 30-year-old man with a distal forearm laceration from a motor vehicle crash 5. A 35-year-old man with radial hand pain after a fall 6. A 23-year-old man who cannot extend his index finger 7. A 50-year-old man with progressive finger flexion contractures 8. A 24-year-old woman with thumb pain and weak grip after a fall 9. A 45-year-old woman who cannot actively extend her small finger 10. A 60-year-old man with a 2-year history of a nail deformity 11. A newborn infant with a thumb deformity 12. A 45-year-old man with progressive hand weakness and clumsiness 13. A 15-year-old boy unable to extend his thumb after a wrist fracture 14. A 60-year-old woman with progressive thumb swelling and deformity 15. A 64-year-old man with an infected finger 16. A 35-year-old man with a proximal phalanx fracture 17. A 47-year-old woman with a painful volar wrist mass 18. A 53-year-old woman with longstanding left thumb pain and grip weakness 19. A 29-year-old man with ring and fifth finger pain 20. A 45-year-old man with loss of volar finger coverage 21. A 36-year-old man with wrist pain for the past 3 months 22. A 49-year-old woman with hand numbness and weakness 23. A 37-year-old nurse with wrist pain at work 24. A 46-year-old woman with an asymptomatic lesion on hand x-ray 25. A 46-year-old woman with an injured index finger 26. A 71-year-old woman with rheumatoid arthritis and a weak grip 27. A 26-year-old woman with a mass on her right wrist 28. A 65-year-old man with a painful and swollen index finger 29. A 19-year-old maintenance worker with acute onset of severe bilateral forearm pain 30. A 16-year-old girl with metacarpophalangeal joint pain 31. A 35-year-old quadriplegic man with poor hand function 32. A 68-year-old man with a nail deformity and mass on his index finger 33. A 45-year-old man with wrist and finger limitations after a humerus fracture 34. A 56-year-old woman with ulcerations at her distal fingertips 35. A 70-year-old man with chronic wrist pain 36. A 20-year-old man with a snakebite 37. An infant boy with conjoined fingers 38. A 9-month-old child who doesn't extend his left thumb 39. A 27-year-old man with an amputated finger 40. A 17-year-old boy with an injury to his fifth proximal interphalangeal joint 41. A 60-year-old gardener with a stiff finger 42. A 20-year-old man with a mass on his volar forearm 43. A 15-year-old boy with progressive finger flexion contracture 44. A 19-year-old man with a swollen, painful thumb 45. A 17-year-old boy with hand pain after a fight 46. A 38-year-old tennis pro with dorsal wrist pain 47. A 46-year-old college professor with elbow pain 48. A 35-year-old man with a painful hand lesion 49. A 26-year-old man with acute onset of wrist pain after a fall 50. A 30-year-old surgery resident with wrist pain after a fall 51. A 45-year-old surgeon with thumb avulsion 52. A 60-year-old gentleman with longstanding rheumatoid arthritis 53. A 60-year-old man with failed thumb replantation 54. A 22-year-old man with metacarpophalangeal pain after punching a wall 55. A 36-year-old man with limited motion of his right index finger 56. A 39-year-old woman with interphalangeal joint flexion contractures 57. A 39-year-old man with motion restriction of his left index finger 58. A 31-year-old man with shoulder pain and limited motion 59. A 22-year-old woman with wrist pain and paresthesia 60. A 42-year-old woman with a finger fracture after a fall 61. A 38-year-old man with a laceration on his left long finger 62. A 49-year-old mechanic with lacerations of his fingers 63. An 18-year-old woman with a laceration of her left small finger 64. A 17-year-old boy with restricted proximal interphalangeal joint motion 65. A 32-year-old man with muscle weakness Index
