<<胃肠x线鉴别诊断Differentia>>

内容概要

This publication is an extract from a work on radiographic diagnosis - Burgener and Korman's "Differential Diagnosis in Conventional Radiology". It focuses on the radiographic diagnosis of gastrointestinal diseases, allowing the professional to access and make use of the vital information they need for this area of diagnosis in a targeted and, therefore, time- and cost-effective manner. By presenting original illustrations of almost all the conditions mentioned in the text alongside tables showing the most important additional differential diagnostic information, the book points to the correct diagnosis even in difficult cases.

<<胃肠x线鉴别诊断Differentia>>
