

<<Advances in Informat>>

图书基本信息

书名：<<Advances in Information Systems(信息信息系统进展/会议录系统进展/会议录)>>

13位ISBN编号：9783540234784

10位ISBN编号：3540234780

出版时间：2003-11-1

出版时间：Springer

作者：Yakhno,Tatyana

页数：617

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<Advances in Informat>>

### 内容概要

This book constitutes the refereed proceedings of the Third International Conference on Advances in Information Systems, ADVIS 2004, held in Izmir, Turkey in October 2004. The 61 revised full papers presented were carefully reviewed and selected from 203 submissions. The papers are organized in topical sections on databases and datawarehouses, data mining and knowledge discovery, Web information systems development, information systems development and management, information retrieval, parallel and distributed data processing, multimedia information systems, information privacy and security, evolutionary and knowledge-based systems, software engineering and business process modeling, and network management.

## 书籍目录

Databases and Data Warehouses   Temporality in Databases   On Uncertainty and Data-Warehouse Design   A Data Warehouse Engineering Process   Aggregation and Analysis of Spatial Data by Means of Materialized Aggregation Tree   An Object-Oriented Framework for Reconciliation and Extraction in Heterogeneous Data Federations   On Optimising Data Access Via Materialised Methods in Object-Oriented Systems   Some Modifications of Bucket-Based Algorithms for Query Rewriting Using Views

Data Mining and Knowledge Discovery   A Data Mining Application on Air Temperature Database   Incremental Association Rule Mining Using Materialized Data Mining Views   Outlier Effects on Databases   Finding Maximal Similar Paths Between XML Documents Using Sequential Patterns

Web Information Systems Development   Using Ontologies for Collaborative Information Management: Some Challenges and Ideas   The Construction of Domain Ontology and Its Application to Document Retrieval   WetDL: A Web Information Extraction Language   Towards Building Knowledge Centres on the World Wide Web   Navigation Modelling from a User Services Oriented Approach   Kreios: Towards Semantic Interoperable Systems   Adaptive Architecture for Web Server Survivability

Information Systems Development and Management   Integration and Maintenance of Heterogeneous Applications and Data Structures   A Component Language for Hybrid Solver Cooperations   Non-interleaved Quadtree Node Codification   Parameterized Formatting of an XML Document by XSL Rules   A Middleware Approach to Storing and Querying XML Documents in Relational Databases

Information Retrieval Parallel and Distributed Data Processing

Multimedia Information Systems

Information Privacy and Security

Evolutionary and Knowledge-Based Systems

Software Engineering and Business Process Models

Network Management
