

<<Frontiers of Combini>>

图书基本信息

书名：<<Frontiers of Combining Systems 组合系统前沿/会议录>>

13位ISBN编号：9783540290513

10位ISBN编号：3540290516

出版时间：2005-10

出版时间：1 (2005年10月19日)

作者：Bernhard Gramlich

页数：320

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<Frontiers of Combini>>

内容概要

This book constitutes the refereed proceedings of the 5th International Workshop on Frontiers of Combining Systems, FroCoS 2005, held in Vienna, Austria, in September 2005. The 19 revised full papers presented including 2 system descriptions were carefully reviewed and selected from 28 submissions. The papers are organized in topical sections on combinations of logics, theories, and decision procedures; constraint solving and programming; combination issues in rewriting and programming as well as in logical frameworks and theorem proving systems.

书籍目录

Logics, Theories, and Decision Procedures I Invited Contribution: A Comprehensive Framework for Combined
Decision Procedures Connecting Many-Sorted Structures and Theories Through Adjoint Functions
Combining Data Structures with Nonstably Infinite Theories Using Many-Sorted Logic On a Rewriting
Approach to Satisfiability Procedures: Extension, Combination of Theories and an Experimental
Appraisal Interface Formalisms Invited Contribution: Sociable Interfaces Logics, Theories, and Decision
Procedures II About the Combination of Trees and Rational Numbers in a Complete First-Order Theory A
Complete Temporal and Spatial Logic for Distributed Systems Constraint Solving and Programming Invited
Contribution: Hybrid CSP Solving An Efficient Decision Procedure for UTVPI Constraints Declarative
Constraint Programming with Definitional Trees Logical Problem Analysis and Encoding I Logical Analysis of
Hash Functions Combination Issues in Rewriting and Programming Proving and Disproving Termination of
Higher-Order Functions Proving Liveness with Fairness Using Rewriting A Concurrent Lambda Calculus with
Futures Compositional System Design and Refinement Tutorial: The ASM Method for System Design and
Analysis. A Tutorial Introduction Logical Problem Analysis and Encoding II Invited Contribution: Matching
Classifications via a Bidirectional Integration of SAT and Linguistic Resources Theorem Proving Frameworks and
Systems Connecting a Logical Framework to a First-Order Logic Prover System Description: Combination of
Isabelle/HOL with Automatic Tools System Description: ATS: A Language That Combines Programming
with Theorem Proving Author Index
