

<<Logic for Programmin>>

图书基本信息

书名：<<Logic for Programming, Artificial Intelligence, and Reasoning编程、人工智能与推理用逻辑学>>

13位ISBN编号：9783540305538

10位ISBN编号：354030553X

出版时间：2006-1

出版时间：湖北辞书出版社

作者：Geoff Sutcliffe

页数：742

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<Logic for Programmin>>

### 内容概要

This book constitutes the refereed proceedings of the 12th International Conference on Logic for Programming, Artificial Intelligence, and Reasoning, LPAR 2005, held in Montego Bay, Jamaica in December 2005. The 46 revised full papers presented together with abstracts of 3 invited talks were carefully reviewed and selected from 108 full paper submissions. The papers address all current issues in logic programming, logic-based program manipulation, formal method, automated reasoning, and various kinds of AI logics.

## &lt;&lt;Logic for Programmin&gt;&gt;

## 书籍目录

Independently Checkable Proofs from Decision Procedures: Issues and Progress  
Zap: Automated Theorem Proving for Software Analysis  
Decision Procedures for SAT, SAT Modulo Theories and Beyond The Barcelo  
logicTools  
Scaling Up: Computers vs. Common Sense  
A New Constraint Solver for 3D Lattices and Its Application to the Protein Folding Problem  
Disjunctive Constraint Lambda Calculi  
Computational Issues in Exploiting Dependent And-Parallelism in Logic Programming: Leftness Detection in Dynamic Search Trees  
The nomore++ Approach to Answer Set Solving  
Optimizing the Runtime Processing of Types in Polymorphic Logic Programming Languages  
The Four Sons of Penrose  
An Algorithmic Account of Ehrenfeucht Games on Labeled Successor Structures  
Second-Order Principles in Specification Languages for Object-Oriented Programs  
Strong Normalization of the Dual Classical Sequent Calculus  
Termination of Fair Computations in Term Rewriting  
Confluence of Infinitary Combinatory Reduction Systems  
Matching with Regular Constraints  
Recursive Path Orderings Can Also Be Incremental  
Automating Coherent Logic  
The Theorema Environment for Interactive Proof Development  
A First Order Extension of Stmarck's Method  
Regular Derivations in Basic Superposition-Based Calculi  
On the Finite Satisfiability Problem for the Guarded Fragment with Transitivity  
Deciding Separation Logic Formulae by SAT and Incremental Negative Cycle Elimination  
Monotone AC-Tree Automata  
On the Specification of Sequent Systems.....  
Author Index
