The LNCS series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science resarch forum available.   The scope of LNCS, including its subseries LNAI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material publised traditionally includes.   -proceedings(published in time for the respective conference)   -post-proceedings(consisting of thoroughly revised final full papers)   -research monographs(which may be basde on outstanding PhD work, research projects, technical reports, etc.).

Invited Papers   The Lixto Project: Exploring New Frontiers of Web Data Extraction   An Overview of a Scalable Distributed Database System SD-SQL ServerData Modelling and Architectures and Transaction Management   Using UML's Sequence Diagrams for Representing Execution Models Associated to Triggers   An Experimental Consideration of the Use of the TransrelationalTM Model for Data Warehousing   Reducing Sub-transaction Aborts and Blocking Time Within Atomic Commit ProtocolsData Integration and Interoperability and Information Retrieval   Query Translation for Distributed Heterogeneous Structured and Semi-structured Databases   Information Retrieval Evaluation with Partial Relevance Judgment   Sources of Incompleteness in Grid PublishingQuery Processing and Optimization   Privacy Preservation and Protection by Extending Generalized Partial Indices   On the Optimal Ordering of Maps, Selections, and Joins Under Factorization   An I/O Optimal and Scalable Skyline Query AlgorithmData Mining   A Novel Clustering Method Based on Spatial Operations   A FP-Tree-Based Method for Inverse Frequent Set Mining   SC-Tree: An Efficient Structure for High-Dimensional Data Indexing   A Heterogeneous Computing System for Data Mining Workflows   An Efficient System for Detecting Outliers from Financial Time SeriesData Warehousing and Decision-Support Systems   Efficient Update of Data Warehouse Views with Generalised Referential Integrity Differential Files   SAGA: A Combination of Genetic and Simulated Annealing Algorithms for Physical Data Warehouse DesignData Streaming Poster PapersAuthor Index
