

图书基本信息

书名：<<创新因特网计算系统/会议录 Innovative Internet computing systems>>

13位ISBN编号：9783540437901

10位ISBN编号：3540437908

出版时间：2002-12

出版时间：1 edition (2002年8月1日)

作者：Herwig Unger

页数：249

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## 内容概要

This book constitutes the refereed proceedings of the second international workshop on Innovative Internet Computing Systems, IICS 2002, held in K ü hlungsborn, Germany, in June 2002. The 19 revised full papers presented together with an invited paper were carefully reviewed and selected from over 30 submissions. Among the topics addressed are large-scale distributed computing infrastructures presenting new challenges to information and Web technology, the management and retrieval of web-based information, content classification, web-based communities management, structure and retrieval of information from large distributed data bases, and the representation of the distributed nature of information by means of graph-theoretical models.

书籍目录

Workshop Innovative Internet Computing Systems Living Hypertext-Web Retrieval Techniques for ~iYadditional Database-Centric Information Automatic Analysis of Large Text Corpora - A Contribution to Structuring WEB Communities A Data Mining Architecture for Distributed Environments Collaborative Highlighting for Real-Time Group Editors Extending the Modeling Efficiency of the UML Activity Diagram for the Design of Distributed Systems An XML Knowledge Base System for Scheduling Problems Compressibility as a Measure of Local Coherence in Web Graphs On the Spectrum and Structure of Internet Topology Graphs Characterizing the Citation Graph as a Self-Organizing Networked Information Space Characterization and Management of Dynamical Behavior in a System with Mobile Components Ergotracer: An Internet User Behaviour Tracer. A Friendly Peer-to-Peer File Sharing System with Profit but without Copy Protection A Decentral Library for Scientific Articles Optimisation of Distributed Communities Using Cooperative Strategies Proven IP Network Services: From End-User to Router and vice versa Mobility Support for Replicated Real-Time Applications Empirical Study of VBR Traffic Smoothing in Wireless Environment Compiling Rule-Based Agents for Distributed Databases A Formal Framework for E-Barter Based on Microeconomic Theory and Process AlgebrasInvited Talk Peer-to-Peer beyond File SharingAuthor Index
