内容概要

This book is the eighth in the successful line of Intelligent Agents books published in LNAI. It is based on the Eighth International Workshop on Agent Theories, Architectures, and Languages, ATAL 2001, held in Seattle, WA, USA, in August 2001. The 31 revised full papers presented together with an overall introduction and two special session overviews were carefully reviewed and selected during two rounds of improvement from 68 submissions. The papers are organized in topical sections on agent modeling; formal specification and verification of agents; agent architectures and languages; agent communication; collaborative planning and resource allocation; trust and safety, formal theories of negotiation; and agents for hand-held, mobile, or embedded devices.

书籍目录

Introduction Agent Modeling Knowledge Level Software Engineering Emotions and Personality in Agent Design and Modeling The Calculus: An Algebraic Agent Language Evolving Real-Time Local Agent Control for Large-Scale Multi-agent Systems Formal Specification and Verification of Agents On the Epistemic Feasibility of Plans in Multiagent Systems Specifications On Multi-agent Systems Specification via Deontic Logic Agents and Roles: Refinement in Alternating-Time Temporal Logic The Computational Complexity of Agent Verification Agent Architectures and Languages A Goal-Based Organizational Perspective on Multi-agent Architectures MINRVA-A Dynamic Logic Programming Agent Architecture Running AgentSpeak(L) Agents on SIM_AGENT Agent Communication Ontological Overhearing Agent Dialogues with Conflicting Preferences An Abstract Machine for Classes of Communicating Agents Based on Deduction A Formal Semantics for Proxy Communicative Acts Commitment Machines Collaborative Planning and Resource Allocation Generating Bids for Group-Related Actions in the Context of Prior Commitments Dynamic Distributed Resource Allocation: A Distributed Constraint Satisfaction Approach Improving Optimality of n Agent Envy-Free Divisions Trust and Safety Trustworthiness of Information Sources and Information Pedigrees Revisiting Asimov's First Law: A Response to the Call to Arms Formal Theories of Negotiation Formal Theories of Negotiation. Section Introduction A Stable and Feasible Payoff Division for Coalition Formation in a Class of Task Oriented Domains Agents for Hand-Held, Mobile, or Embedded Devices Author Index
