

图书基本信息

书名：<<实时与容错系统中的形式技术 / 会议录Formal techniques in real-time and fault-tolerant systems>>

13位ISBN编号：9783540441656

10位ISBN编号：3540441654

出版时间：2002-12

出版时间：湖南文艺出版社

作者：Damm, W.; Olderog, E. R.; Damm, Werner

页数：452

内容概要

This book constitutes the refereed proceedings of the 7th International Symposium on Formal Techniques in Real-Time and Fault-Tolerant Systems, FTRTFT 2002, held in Oldenburg, Germany, in September 2002. The 17 revised full papers presented together with 2 invited tutorials and 6 invited papers were carefully reviewed and selected from 39 submissions. The papers are organized in topical sections on synthesis and scheduling, timed automata, bounded model checking, verification and conformance testing, and UML models and model checking.

书籍目录

I Invited Tutorials UPPAAL Implementation Secrets Software Hazard and Safety AnalysisII Invited Papers
Real-Time Operating Systems: Problems and Novel Solutions Real-Time UML Eager Class Initialization for
Java Applications of Formal Methods in Biology An Overview of Formal Verification for the Time-Triggered
Architectm Scheduler Modeling Based on the Controller Synthesis ParadigmIII Synthesis and Scheduling
Component-Based Synthesis of Dependable Embedded Software From the Specification to the Scheduling of
Time-Dependent Systems On Control with Bounded Computational ResourcesIV Timed Automata I
Decidability of Safety Properties of Timed Multiset Rewriting Extending Timed Automaton and Real-Time
Logic to Many-Valued Reasoning Fault Diagnosis for Timed Automata V Bounded Model Checking
Verification of Timed Automata via Satisfiability Checking Take It NP-Easy: Bounded Model Construction
for Duration Calculus Towards Bounded Model Checking for the Universal Fragment of TCTLVI Verification
and Conformance Testing A Typed Interrupt Calculus Parametric Verification of a Group Membership
Algorithm A Method for Testing the Conformance of Real Time SystemsVII UML Models and Model
Checking A Probabilistic Extension of UML Statecharts Eliminating Queues from RT UML Model
Representations Model Checking - Timed UML State Machines and CollaborationsVIII Timed Automata II
Partial Order Path Technique for Checking Parallel Timed Automata Constructing Test Automata from
Graphical Real-Time RequirementsAuthor Index
