<<协作信息系统的工程和展开Engin>>

内容概要

This book constitutes the refereed proceedings of the First International Conference on Engineering and Employment of Cooperative Information Systems, EDCIS 2002, held in Beijing, China, in September 2002. The 44 revised full papers presented were carefully reviewed and selected from 159 submissions. The papers are organized on topical sections on workflow, ontologies, semantic web, enterprise application integration, mobile agents, enterprise modelling, distributed systems, analysis, software engineering, architectures, transactions, coordination, and groupware.

书籍目录

Workflows I A Data Warehouse for Workflow Logs Workflow and Knowledge Management: Approaching an Integration Linear Temporal Inference of Workflow Management Systems Based on Timed Petri Net Models Workflows II Discovering Workflow Performance Models from Timed Logs Performance Equivalent Analysis of Workflow Systems Based on Stochastic Petri Net Models An Agent Enhanced Framework to Support Pre-dispatching of Tasks in Workflow Management Systems Ontologies TEMPLET: A New Method for Domain-Specific Ontology Design An Environment for Multi-domain Ontology Development and Knowledge Acquisition Applying Information Retrieval Technology to Incremental Knowledge Management Semantic Web Visualizing a Dynamic Knowledge Map Using a Semantic Web Technology Indexing and Retrieval of XML-Encoded Structured Documents in Dynamic Environment Knowledge Management: System Architectures, Main Functions, and Implementing Techniques Enterprise Application Integration A Dynamic Matching and Binding Mechanism for Business Service Integration A Uniform Model for Authorization and Access Control in Enterprise Information Platform Constraints-Preserving Mapping Algorithm from XML-Schema to Relational Schema Mobile Agents Study on SOAP-Based Mobile Agent Techniques Securing Agent Based Architectures Service and Network Management Middleware for Cooperative Information Systems through Policies and Mobile Agents Enterprise Modeling Research on Enterprise Modeling of Agile Manufacturing HCM - A Model Describing Cooperation of Virtual Enterprises A Description for Service Supporting Cooperations Distributed Systems Analysis Software Engineering Architectures Transactions Coordination I Coordination II Groupware I Groupware II Author Index
