

<<神经信息处理LNCS-4233>>

图书基本信息

书名：<<神经信息处理LNCS-4233>>

13位ISBN编号：9783540464815

10位ISBN编号：3540464816

出版时间：2006-12

出版时间：Springer Verlag

作者：King, Irwin (EDT)/ Wang, Jun (EDT)/ Chan, Laiwan (EDT)/ Wang, Deliang (EDT)

页数：1203

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

The LNCS series reports state-of-the-art results in computer science research , development , and education , at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community , with numerous individuals , as well as with prestigious organizations and societies , LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS , including its subseries LNAI , spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes. —proceedings (published in time for the respective conference) —post-proceedings (consisting of thoroughly revised final full papers) —research monographs (which may be based on outstanding PhD work , research projects , technical reports , etc.) .

书籍目录

Pattern Classification Distance Function Learning in Error-Correcting Output Coding Framework
Combining Pairwise Coupling Classifiers Using Individual Logistic Regressions The Novelty Detection
Approach for Different Degrees of Class Imbalance A Novel Multistage Classification Strategy for Handwriting
Chinese Character Recognition Using Local Linear Discriminant Analysis Prototype Based Classification
Using Information Theoretic Learning A Modal Symbolic Classifier for Interval Data Hough Transform
Neural Network for Seismic Pattern Detection Autonomous and Deterministic Clustering for
Evidence-Theoretic Classifier Bark Classification Based on Gabor Filter Features Using RBPNN Neural
Network A Hybrid Handwritten Chinese Address Recognition Approach A Morphological Neural Network
Approach for Vehicle Detection from High Resolution Satellite Imagery Secure Personnel Authentication
Based on Multi-modal Biometrics Under Ubiquitous Environments Pattern Classification Using a Set of
Compact Hyperspheres Direct Estimation of Fault Tolerance of Feedforward Neural Networks in Pattern
Recognition A Fully Automated Pattern Classification Method of Combining Self-Organizing Map with
Generalization Regression Neural Network Comparison of One-Class SVM and Two-Class SVM for Fold
Recognition Efficient Domain Action Classification Using Neural Networks A New Hierarchical Decision
Structure Using Wavelet Packet and SVM for Brazilian Phonemes Recognition Face Analysis and Processing A
Passport Recognition and Face Verification Using Enhanced Fuzzy Neural Network and PCA Algorithm A
Weighted FMM Neural Network and Its Application to Face Detection Fast Learning for Statistical Face
Detection.....Author Index
