

<<基于知识的智能信息与工程系统>>

图书基本信息

书名：<<基于知识的智能信息与工程系统>>

13位ISBN编号：9783540465423

10位ISBN编号：3540465421

出版时间：2006-12

出版时间：Springer Verlag

作者：Gabrys, Bogdan (EDT)/ Howlett, Robert J. (EDT)/ Jain, Lakhmi C. (EDT)

页数：1301

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

内容概要

The three volume set LNAI 4251, LNAI 4252, and LNAI 4253 constitute the refereed proceedings of the 10th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2006, held in Bournemouth, UK, in October 2006. The 480 revised papers presented were carefully reviewed and selected from about 1400 submissions. The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense. The third volume contains papers on chance discovery, context aware evolvable and adaptable systems and their applications, advanced groupware and network services, computational methods for intelligent neuro-fuzzy applications, intelligent information processing for remote sensing, evolutionary and self-organising sensors, actuators and processing hardware, human intelligent technology, connectionist models and their applications, intelligent and cognitive communication systems, innovations in intelligent agents and applications, intelligent pattern recognition and classification in astrophysical and medical images, intelligent multimedia solutions and security in the next generation mobile information systems (IMSS), engineered applications of semantic Web - SWEA, intelligent techniques in the stock market, soft computing techniques and their applications, human computer intelligent systems, recommender agents and adaptive Web-based systems, intelligent data analysis for complex environments, creativity support systems, artificial intelligence applications in power electronics, soft computing approaches to management engineering, knowledge processing in intelligent and cognitive communicative systems - KPICCS 2006, intelligent and secure digital content management, business knowledge modelling and maintenance, innovations in intelligent systems and their applications, intelligent agents and their applications, as well as signal processing techniques for knowledge extraction and information fusion.

<<基于知识的智能信息与工程系统>>

书籍目录

Chance Discovery Closed-Ended Questionnaire Data Analysis Strategies Emerging from Game Play: Experience from an Educational Game for Academic Career Design Concept Sharing Through Interaction: The Effect of Information Visualization for Career Design What Should Be Abducible for Abductive Nursing Risk Management? The Repository Method for Chance Discovery in Financial Forecasting Emerging Novel Scenarios of New Product Design with Teamwork on Scenario Maps Using Pictorial KeyGraph Creative Design by Bipartite KeyGraph Based Interactive Evolutionary Computation Discovering Chances for Organizational Training Strategies from Intra-group Relations Trust, Ethics and Social Capital on the Internet: An Empirical Study Context Aware Evolvable and Adaptable Systems and Their Applications Context-Aware Application System for Music Playing Services Query Based Summarization Using Non-negative Matrix Factorization Intelligent Secure Web Service Using Context Information Study for Intelligent Guide System Using Soft Computing Implementation of a FIR Filter on a Partial Reconfigurable Platform A Context Model for Ubiquitous Computing Applications Adaptive Classifier Selection on Hierarchical Context Modeling for Robust Vision Systems Advanced Groupware and Network Services Wireless Internet Service of Visited Mobile ISP Subscriber on GPRS Network An Exploratory Analysis on User Behavior Regularity in the Mobile Internet Reliable Communication Methods for Mutual Complementary Networks..... Computational Methods for Intelligent Neuro-fuzzy Applications Intelligent Information Processing for Remote Sensing Evolutionary and Self-organising Sensors, Actuators and processing hardware Human Intelligent Technology Connectionist Models and Their Applications Intelligent and Cognitive Communication Systems Innovations in Intelligent Agents and Applications Intelligent Pattern Recognition and Classification in Astrophysical and Medical Images Intelligent Multimedia Solutions and Security in the Next Generations Mobile Information Systems Engineered Applications of Semantic Web-SWEA Intelligent Techniques in the Stock Market Soft Computing Techniques and Their Applications Human Computer Intelligent Systems Recommender Agents and Adaptive Web-Based Systems Intelligent Data Analysis for Complex Environments Creativity Support Systems Artificial Intelligence Applications in Power Electronics Soft Computing Approaches to management Engineering Knowledge Processing in Intelligent and Cognitive Communicative Systems Intelligent and Secure Digital Content Management Business Knowledge Modelling and maintenance Innovations in Intelligent Systems and Their Applications Intelligent Agents and Their Applications Signal Processing Techniques for Knowledge Extraction and Information Fusion Author Index
