<<连网的组合与算法研究>>

内容概要

This book constitutes the thoroughly refereed post-proceedings of the Third Workshop on Combinatorial and Algorithmic Aspects of Networking, held in Chester, UK in July 2006, co-located with the 13th Colloquium on Structural Information and Communication Complexity, SIROCCO 2006. The 10 revised full papers together with 1 invited lecture presented were carefully reviewed and selected from a total of 22 submissions. The topics covered range from the Web graph to game theory to string matching, all in the context of large-scale networks.
