<<中国杜鹃花 第三册(英文版)>>

内容概要

《中国杜鹃花.第3册(英文版)》主要内容简介：This is the third volume of Rhodo-dendrons of China, which has been compiled on the basis of firsthand information gained through many years of field experience. For each species mentioned in the book, detailed descriptions on botanical characteristics were provided and exquisite and authentic color pictures were attached. 105 species and varieties which belong to 4 subgenera, 7 sections and 24 subsections were gathered in this volume. 294 color pictures and 105 distribution maps were also involved in the book. The species involved in this volume are distributed in Tibet, Yunnan, Guangxi, Sichuan, Jiangxi, Fujian, Hunan and Guangdong provinces and regions. Among the species in this volume, 13 species are new species which were described since 1980's and some of them are published for the first time. Like its previous volumes, the book is not only an invaluable reference work for studying the rhododendrons of China, but also a beautiful album. For anyone who is interested in the rhododendrons of China, this is indeed a valuable collection.
