<<医学英语教程>>

前言

近年来,国内医学英语教材从质和量上都有了很大的变化。

以前国内的医学英语教材不太受重视,或许是研究的人甚少,一般都是一些医学文章的组合,附上词汇表和练习,其实就是医学文章阅读,并不能起到医学英语学习的目的,学习者学后收获不大。

自《大学英语课程要求》颁布以来,各专业英语的学习受到普遍重视。

就医学英语而论,从基础到临床,从听力到会话,从医学术语学习到医学文献阅读,从医学写作到双 语教学,可谓无所不有,适应了各方面的需求。

在这样的大环境下,我仍然编写了这本书,绝不是想表示编者的水平有多高,只是想满足某一层次学习者的需要,也就是时间少、但又想对医学英语构词和医学文献阅读理解及翻译有一定了解的读者。

本书主要针对初涉医学英语的读者,他们不熟悉医学英语术语的构成和医学文献的结构,同时在阅读理解和翻译上存在一定的困难。

为此,在编写过程中,编者参阅了大量的国内外有关书籍和文献。

书中各单元有两篇文章,均选自国外医学语言和医学教材原著(个别地方编者予以改动),并以此为 基础编写了大量的练习,以助医学术语的学习和医学文献的理解。

同时在练习中还选编了一些医学英语长难句,用来训练读者的医学文献长难句分析和翻译能力。

本书的编写得到了许多同行及医学专家的支持和帮助,整个过程中他们给予了许多富有建设性的 建议。

此外川北医学院教务处也在编写和初稿打印方面给予了极大的帮助,在此一并表示衷心感谢。

由于编者的水平有限,书中疏漏错误在所难免,恳请广大读者不吝赐教,以期再版时修订,我将 不胜感激。

书籍目录

Unit One

Reading A Bones, Muscles and Nerves

Reading B Osteomalacia and Rickets

Unit Two

Reading A Skin

Reading B Acne Vulgaris

Unit Three

Reading A Anatomy and Physiology of Respiration

Reading B Spontaneous Pneumothorax

Unit Four

Reading A Urinary Organs and Urinalysis

Reading B Reflux Nephropathy

Unit Five

Reading A Anmomy and Physiology of the Heart

Reading B Infective Endoearditis

Unit Six

Reading A Blood and Blood Groups

Reading B Iron Deficiency Anaemia

Unit Seven

Reading A Lymph and Lymphatic organs

Reading B Hodgkin's Disease

Unit Eight

Reading A Pharmacology

Reading B Altering Drug Dosages in Special Circumstances

Unit Nine

Reading A Psychiatry

Reading B Classification and Aetiology of Psyc: hiatric

Disorders

Unit Ten

Reading A Oral Cavity and the Esophagus

Reading B Dysphagia and Tumou of the Esophagus

Unit Eleven

Reading A Stomach and Intestines

Reading B Peptic Ulcer

Unit Twelve

Reading A Cancer and Carcinogenesis

Reading B Diagnosis of Tumours

Unit Thirteen

Reading A Radiology

Reading B Cihosis of the Liver

Unit Fourteen

Reading A Nuclear Medicine

Reading B Primary Tumours of the Lung

章节摘录

The nervous system is divided into the central nervous system and the peripheral nervous system: the central nervous system is cgmposed of the brain and spinal cord; the peripheral nervous system consists of the cranial and spinal nerves, and their distribution. The nervous system may also be divided into the somatic and autonomic nervous systems. The conducting cells of the nervous system are termed neurons. A typical motor neuron con-sists of a cell body which contains the nucleus and gives off a single 8xon and numerous dendrites. The cell bodies of most neurons are located within the central nervous system, where they aggregate to form nuclei. Cell bodies in the peripheral nervous system aggregate in ganglia. Axons are the nerve fibers and conduct action potentials generated in the cell body, to influ - ence other neurons or affect organs. They may be my elinated or non-myelinated. Most nerves in the peripheral nervous system are bundles of motor, sensory, and autonomic axons. The region of the head is largely supplied by the 12 cranial nerves. The remainder of the trunk and the limbs are segmentally supplied by the spinal nerves.
