

<<结构动态设计的矩阵摄动理论>>

图书基本信息

书名 : <<结构动态设计的矩阵摄动理论>>

13位ISBN编号 : 9787030186980

10位ISBN编号 : 7030186982

出版时间 : 2007-1

出版时间 : 科学

作者 : 陈塑寰

页数 : 248

版权说明 : 本站所提供之下载的PDF图书仅提供预览和简介,请支持正版图书。

<<结构动态设计的矩阵摄动理论>>

内容概要

A matrix perturbation theory in structural dynamic design is presented in this book. The theory covers a broad spectrum of subjects , the perturbation methods of the distinct eigenvalues and repeated/close eigenvalues , the perturbation methods of the complex modes of systems with real unsymmetric matrices , the perturbation methods of the defective/near defective systems , random eigenproblem and the interval eigenproblem for the uncertain structures . The contents synthesized the most recent research results in the structural dynamics . Numerical examples are provided to illustrate the applications of the theory in this book. This book is recommended to graduates , engineers and scientist of mechanical , civil , aerospace , ocean and vehicle engineering.
