

<<生物信息学中的数学方法>>

图书基本信息

书名：<<生物信息学中的数学方法>>

13位ISBN编号：9787030369857

10位ISBN编号：7030369858

出版时间：2013-4

出版时间：科学出版社

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<生物信息学中的数学方法>>

书籍目录

PREFACE

CHAPTER 1 SOME BIOLOGICAL CONCEPTS 1 . 1 Cell 1 . 2 Genetic Material : DNA, Gene and RNA 1 . 2 . 1 DNA 1 . 2 . 2 Gene 1 . 2 . 3 RNA 1 . 3 Protein and Amino Acids 1 . 4 Chromosome 1 . 5 Omics 1 . 5 . 1 Genomics 1 . 5 . 2 Microarray 1 . 5 . 3 Proteomics 1 . 5 . 4 Lipidomics

REFERENCES

CHAPTER 2 GRAPHICAL REPRESENTATIONS OF DNA SEQUENCE 2 . 1 Three-Dimension (3-D) Graphical Representation 2 . 2 2-D Graphical Representation 2 . 3 2-D Graphical Representations Without Degeneracy 2 . 4 Used a 1-D Numerical Representation of four Nucleotides to Construct a 2-D Graphical Representation of the DNA Sequence

REFERENCES

CHAPTER 3 NUMERICAL REPRESENTATIONS OF DNA SEQUENCE 3 . 1 4-D and 3-D Numerical Representations of a DNA Sequence 3 . 2 2-D Numerical Representations of a DNA Sequence 3 . 3 The Complex Numerical Representation 3 . 4 1-D Numerical Representations of four Nucleotides and 2-D Graphical Representation of a DNA Sequence 3 . 5 The Representations of Feature Vector, Genome Space and Matrix Representation of DNA Sequence 3 . 6 The Numerical Representation Based on Physical, Chemical and Structural Properties of DNA Sequence 3 . 6 . 1 The numerical representations based on some attribute equivalences of nucleotides 3 . 6 . 2 The representation of DNA by the inspiration from codon and the idea of three attribute equivalences 3 . 6 . 3 EIP numerical representation for nucleotides

REFERENCES

CHAPTER 4 NUMERICAL REPRESENTATIONS OF PROTEIN 4 . 1 1-D Numerical and Graphical Representations of the Amino Acid Sequence 4 . 2 2-D Numerical and Graphical Representations of the Amino Acid Sequence 4 . 3 A 2-D Graphical Representation and Moment Vector Representation of Protein 4 . 4 3-D Numerical Representation of Protein 4 . 5 The 10-D Representation of an Amino Acid 4 . 6 The Vector and Matrix Representations of Protein Sequence and Protein Space 4 . 7 Other Schemes of the Representation for Protein

REFERENCES

CHAPTER 5 PRACTICAL ORTHOGONAL TRANSFORM 5 . 1 Some Features and Algorithms for the Discrete Fourier Transform 5 . 1 . 1 Fourier transforms of the original sequence and its subsequence 5 . 1 . 2 The independency of the Fourier transforms at several frequencies 5 . 1 . 3 The Fourier transform of symbolic sequence 5 . 1 . 4 Fourier transform of binary sequence 5 . 1 . 5 Several algorithms of Fourier transform 5 . 1 . 6 The properties of Fourier transform of real sequence 5 . 2 Wavelet Analysis 5 . 2 . 1 Introduction 5 . 2 . 2 Multiresolution analysis of a function by Haar scaling and wavelet function 5 . 2 . 3 Construction of wavelet systems 5 . 2 . 4 Mallet transform

REFERENCES

CHAPTER 6 IDENTIFYING PROTEIN-CODING REGIONS (EXONS) BY NUCLEOTIDE DISTRIBUTIONS 6 . 1 Protein Coding Regions Finding in DNA Sequence 6 . 1 . 1 Introduction 6 . 1 . 2 The stochastic simulation and several computing formulae 6 . 1 . 3 FEND algorithm , predicting protein coding regions from nucleotide distributions on the three positions of a DNA sequence 6 . 1 . 4 Performance evaluation of FEND algorithm 6 . 2 The Experiment for Distinguishing Exon and Intron Sequences by a Threshold 6 . 2 . 1 Motivation 6 . 2 . 2 Idea of distinguishing exon and intron sequences 6 . 2 . 3 Results and discussion

REFERENCES

CHAPTER 7 PROTEIN COMPARISON BY ORTHOGONAL TRANSFORMS 7 . 1 Protein Comparison by Discrete Fourier Transformation (DFT) 7 . 1 . 1 EIP representation of protein sequence 7 . 1 . 2 Symmetry of discrete Fourier transform of real sequence 7 . 1 . 3 Cross-spectral function 7 . 2 Protein Comparison by Discrete Wavelet Transformation 7 . 2 . 1 Several techniques needed for DWT method 7 . 2 . 2 The performance of the DWT method

REFERENCES

CHAPTER 8 THE APPLICATION OF VECTOR REPRESENTATIONS TO BIOLOGICAL MOLECULE ANALYSIS 8 . 1 Use Feature Vector to Analyze DNA Sequences 8 . 1 . 1 Feature vector representation of DNA sequence 8 . 1 . 2 Comparing DNA sequences 8 . 2 A Protein Map and its Applications . 8 . 2 . 1 Recalling a 2-D graphical representation and moment vector representation of protein 8 . 2 . 2 Protein map and cluster analysis 8 . 3 An Appendix : Introduction to Cluster Analysis

REFERENCES

CHAPTER 9 THE STATISTICS ANALYSIS OF LARGE AMOUNT OF EXPERIMENTAL DATA 9 . 1 A Way to Process Microarray Data 9 . 1 . 1 Data form 9 . 1 . 2 Microarray data set . 9 . 1 . 3 Preliminary filtering 9 . 1 . 4 Assessing normalization 9 . 1 . 5 Hypothesis test . 9 . 1 . 6 Conclusion 9 . 2 The Statistical Analysis of a Set of Lipidomics Data 9 . 2 . 1 Introduction 9 . 2 . 2 Statistical

<<生物信息学中的数学方法>>

techniques of initial data processing 9 . 2 . 3 Initial data arrangement 9 . 2 . 4 Hypothesis testing analysis

REFERENCES

CHAPTER 10 APPLY SINGULAR VALUE DECOMPOSITION TO MICROARRAY ANALYSIS

10 . 1 SVD , PCA and GSVD

10 . 1 . 1 Singular value decomposition

10 . 1 . 2 Principal component analysis

10 . 1 . 3 Generalized singular value decomposition

10 . 2 Apply SVD / PCA to Microarray Analysis

10 . 3 GSVD Analyzes the Microarray Data

REFERENCES

CHAPTER 11 DYNAMICAL ANALYSIS MODELS OF GENE EXPRESSION

11 . 1 Differential Equations Model of Gene Expression

11 . 1 . 1 Transcription model

11 . 1 . 2 Nonlinear dynamic equations

11 . 1 . 3 Linearization of the nonlinear transcription model

11 . 1 . 4 Approximating coefficient matrix M by Fourier series

11 . 1 . 5 Solution to transcription matrix C and V

11 . 2 Modified Linear Differential Equations Model

11 . 3 Dynamical Model Based on Singular Value Decomposition . 11 . 3 . 1 Introduction

11 . 3 . 2 Reducing gene's number

11 . 3 . 3 The approach based on singular value decomposition (SVD)

11 . 3 . 4 The methods of solving dynamical models

REFERENCES

CHAPTER 12 MISSING MICROARRAY DATA INPUTTING

12 . 1 The Ad Hoc Methods

12 . 2 Missing Data Inputting Based on SVD

12 . 2 . 1 A new way for missing data inputting

12 . 2 . 2 Other method based on SVD

12 . 3 Weighted K-Nearest Neighbors . KNN . Impute Algorithm

12 . 4 Estimation of Missing values in Microarray Data Based on the Least Square Principle

12 . 4 . 1 Least squares estimate of the unknown variable

12 . 4 . 2 The least square estimation of missing data based on genes . 12 . 4 . 3 The least square estimation of missing data based on arrays

12 . 4 . 4 Combining the gene and array based estimates

12 . 5 Local Least Square Inputting rLLS input

12 . 5 . 1 Selecting genes

12 . 5 . 2 Gene-wise formulation of local least squares imputation

12 . 6 The Comparison of the Methods of Missing Data Inputting

<<生物信息学中的数学方法>>

编辑推荐

Jiasong Wang编的《Numerical Methods in Bioinformatics An Introduction》介绍了生物信息学计算方法如下：数值替换为代表的数值或图形序列的DNA和蛋白质序列；傅立叶和小波变换应用于基因的鉴定和蛋白质的比较；基于大量实验数据的微阵列或脂类组学数据集，合适的统计和计算的方法研究中使用的两套生物特征，特征向量的表象下，两种生物分子分类的聚类分析完成；微分方程和差分方程模型被建立为代表的生物动力学过程；和丢失的数据输入技术有助于估计丢失条目来自生物学观察与实验，等等。

此外，还介绍了一些生物的概念通过这些方法。
