章节摘录

D . Notetaking Preparation 1 . Prelecture Reading Before listening to a rather difficult lecture on the U . S . legal system , read a related passage dealing with precedents and surrogate mother-hood , and then answer the comprehension questions that follow . Although somewhat difficult , the reading and the questions will prepare you for the lecture you will hear later .

The Baby M Case The Baby M case became a controversial legal case in the United States in 1988 . At issue were Baby M ' s custody and the validity of a contract . The contract provided that a woman , the surrogate mother, would have a baby for an infertile couple by artificial insemination of the husband's sperm and would receive payment for this service . Certainly, Baby M was not the first baby born to a surrogate mother but in this case, the surrogate mother, Mary Beth Whitehead . Gould , changed her mind after the baby was born and did not want to give the baby up , as she had agreed to do in the contract . The Sterns , the couple who had contracted for the baby, insisted that Ms . Whitehead . Gould fulfill the terms of the contract , and they took her to court . The New Jersey Supreme Court ruled that this type of contract was against public policy (the good of the general public) and , therefore , could not be enforced . 《 However, the court did award custody of the baby to the biological father . The mother, Ms . Whitehead . Gould, was awarded limited visitation rights .) This particular ruling was very important because there had been no previous court decision of this type at the level of a state supreme court . Therefore , this decision establishes a precedent for other states when they have to deal with the issue of surrogacy .
