章节摘录

Mrs. Webster enjoys seeing different parts of the world very much. But she does not like traveling by air or by sea. Planes make her feel nervous and ships make her feel seasick. She hates to travel by train or car, for trains make her feel tired, and cars make her feel sleepy. She cannot ride a bike because it may hurt her legs. Nor does she like walking on foot, for she always wears high-heeled shoes. Then how can she manage to see the world? The answer is simple: she sits on a comfortable chair and watches TV!

An international symposium of telecommunications will be held in Tokyo next month. It will last for two weeks. More than ten world famous experts in this field will give lectures at the symposium. Scientists and engineers from all over the world will attend the important meeting. In addition to academic programs, a lot of social events will be offered. These will include sightseeing tours both in and out of Tokyo, visits to cultural and scientific museums and high-tech communication and educational facilities.
