<<专业英语--电气工程及自动化>>

内容概要

内容简介

本书为铁道部“九五”重点教材之一，是高等学校电气工程及自动化专业的专业英语教材，也可供相关专业的工程技术人员学习参考。

编者针对电气自动化、自动控制、电力牵引传动以及电气化铁道供电等专业的内容与特点选取了16篇英语读物，既涉及到电气自动化及相关学科专业的核心领域，又涵盖了较为广泛的专业词汇。

每一篇课文中的关键语句与词组均作了注释，并提出一些与课文内容紧密关联的问题，供读者讨论和思考。

书末还附有专业词汇表和有关核心期刊，以备参考。

书籍目录

CONTENTS

- TEXT ONE New Rolling Stock for the Chinese Railways-Class 8K eight-axle Double Electric Locomotives for the Datong-Qinhuangdao Coal Line
- TEXT TWO IGCTs-Megawatt Power Switches for Medium-Voltage Applications
- TEXT THREE Design aspects of induction motors for traction applications with supply through static frequency changers
- TEXT FOUR A New World Record Is Created by TGV
I We Are a Long Long Way from the Limits of Wheel-Rail Technology
II French Blast TGV up to 515.3 km/h
- TEXT FIVE Japanese Maglev Sets New World Record (550.8 km/h)
- TEXT SIX Distributed Microprocessor Application to Transmission and Distribution Automation Systems
- TEXT SEVEN A Test System for Protective Equipment and Test Methods
- TEXT EIGHT Railway Technology Today-Railway Electric Power Feeding Systems
- TEXT NINE Want to Improve Machine Performance? Try Linear Motors
- TEXT TEN Simulation from Start to Finish
- TEXT ELEVEN Voice I/O in Manufacturing
- TEXT TWELVE Practical Real-Time PWM Modulators: an Assessment
- TEXT THIRTEEN Exploring the CAD-Manufacturing Interface
- TEXT FOURTEEN Are Robots Reliable? Myth vs Reality 1
- TEXT FIFTEEN On the Harmonic Compensation in Nonsinusoidal Systems 1
- TEXT SIXTEEN Application of Micro-Processor Based Test Sets in Comprehensive Testing of Line Protection Equipment in the Field
- APPENDIX 1
Appendix 1 New Words and Expressions
Appendix 11 Key Journals of Specialized Courses
