内容概要

The 6th edition of immunology has been radically revised and updated. The first half of the book covering basic immunology has been completely re-organized. All chapters now include Critical Thinking Boxes, with explanations listed at the back of the book. In the clinical chaptes, and in accordance with the move towards integrated ,problem-based teaching, these Boxes take the form of clinical vignettes. 250 top quality phtographs depict clinical aspects of immunology while over 400 conceptual diagrams simplify even the most complex immunologic processes.

书籍目录

Contributors1.Introduction to the immune system2.Cells, Tissues and organs of the immune system3.Cell migration and imflammation4.Antibodies5.T-cell receptors and major histo-compatility complex molecules6.Antigen presentation7.Cytokines and cytokine receptors8.Cell coooperation the antibody response9.Mononuclear phagocytes in immune defence10.Cell-mediated cytotoxicity11.Regulation of the immune response12.Immunological tolerance13.Evolution of immunity14.Immunity to virses15.Immunity to bacteria and fungi16.Immunity to protozoa and worms17.Vacination18.Tumour immunology19.Primary immunodeficiency20.Secondery immunodeficiency21.Hypersensitvity-Type 22.Hypersensitvity-Type 23.Hypersensitvity-Type 24.Hypersensitvity-Type 25.Transplantation and rejection26.Autoimmunity and autoimmune disease27.Immunological techniquesAppendicesGlossaryExplanations for critical thinking and case studiesIndex
