## 内容概要

The Atlas of the People's Republic of China is the first English-language atlas of the country ever published in China since the founding of the People's Republic in 1949. The maps are organized by administrative divisions and topography. In the first category, four regions of strategic importance and great economic value are mapped in addition to all the provinces, autonomous regions and municipalities directly under the Central Government, which are the first level of administrative divisions under the state. The four geographical rather than administrative regions are the Shanghai-Nanjing-Hangzhou Region south of the last leg of the Yangtze River, the Pearl River Delta, the South China Sea Islands, and the Chengdu-Chongqing Region, the central land of the Sichuan Basin on the middle reaches of the Yangtze River. Accompanying each map of an administrative division is a text covering the following topics:

Populatioo

Urban population

Natiooalities

Area

Altitude

Coastline

Climatic features

Average temperatore

ABBUI average raiofall

Physical features

Mountains

Plateaus

Deserts

Basins

Rivers

Lakes

Products

Specialties

Administrative divisions

Capital

Neighbonog areas

<<中华人民共和国地图集(英文版)>>

Neighboring countries

Major cities (towns)

Tourist attractions

(Continued on backflap)

(Continued from frontflap)

Also, the map of China's general topography with a brief description produces a clearer picture than the map does all by itself. For the convenience of the readers, the alphabetic order of the administrative divisions on the provincial level is available on the title page of the index. The atlas includes some latest changes, such as the establishment of Hainan Province in early 1988.

A comprehensive atlas of China, this volume will be of great value to universities, libraries, and research institutes, as well as individuals.

书籍目录

CONTENTS

Geographical Location of China.  
Administrative Divisions of China  
Beijing Municipality, Tianjin Municipality  
Hebei Province  
Shanxi Province
