<<走下神坛的毛泽东>>

内容概要

The title might have been written by Mao himself. Instead, it was dictated by the revealing, intimate, never-before-published recollections of Li Yinqiao, Mao's bodyguard, and brought to light by the author Quan Yanchi. After fifteen years of devoted service, Li received this request from Mao: "If what happens in my family is a secret to others, it is not a secret to you. But don't write about me while I'm still alive; wait until I die, and write truthfully when you do." For the first time, the personal, inside story of China's dynamic leader and world statesman is told through the life and thought of Mao, the husband, father, comrade-in-arms, the peasant's son. The recollections, only now made public in English, provide the reader with a refreshingly different perspective from any of the many other works about Mao. Highlighting the book are photographs, published here for the first time.
