<<中医内科学>>

作者简介

Born in Ningbo in China's Zhejiang Province, in 1924, Professor Xie Zhufan is a 1946 graduate of the Beijing University Medical College. In 1956 he completed the first ever special training course for teachers in acupuncture held by the Ministry of Public Health. For more than forty years he has been working in the First Teaching Hospital of the Beijing Medical University (formerly the Beijing Medical College), and since the 1950s has been engaged in clinical and experimental studies on the integration of traditional Chinese medicine with Western medicine, concentrating for the most part on internal medicine. He has practised and taught both modern Western medicine and traditional Chinese medicine and has conducted several training courses on traditional Chinese medicine both at home and abroad. A three-time appointee as WHO consultant on traditional medicine in 1985, 1986 and 1990, he has worked in the WHO Regional Office for the Western Pacific. Owing to his particular professional experience, he knows well the difficulties that most Occidentals encounter when they are learning traditional Chinese medicine. He has published a great variety of scientific papers and books, among which his Dictionary of Traditional Medicine has been most particularly well received by his readers. At present he holds the following professional positions: Professor of Medicine, Director of the Institute for the Integration of Traditional and Modern Medicine, Beijing Medical University; Chairman of the Committee of International Academic Exchange, Chinese Association for the Integration of Traditional and Western Medicine; and Vice-Chairman, Beijing Association for

the Integration of Traditional and Western Medicine.

Born in China's Fujian Province, in July 1930, Professor Liao Jiazhen graduated from the Shanxi Medical College in 1955 and completed the Traditional Chinese Medicine Course conducted by the Ministry of Public Health, in 1958. For more than thirty years he has been engaged in practice, teaching and research related to the integration of traditional Chinese and Western medicine. His research has been focussed on clinical and pharmacological studies on the prevention and treatment of coronary heart disease using modern scientific methodology to build on the basis of the traditional theory of correlation between qi and blood. He has published more than 90 academic papers, and has nine times been awarded prizes for his scientific achievements. His present posts are Professor of Internal Medicine, Beijing College of Traditional Chinese Medicine; Vice-Chairman, Chinese Association for the Integration of Traditional Chinese and Western Medicine; Member of the Appraisal Group on the Integration of Traditional Chinese and Western Medicine, Committee of Academic Degrees, the State Council of the People's Republic of China; Deputy Editor-in-Chief, The Pharmacological and Clinical Journal of Chinese Medicine; and Member of the Editorial Board of The Chinese Journal of Integrated Traditional and Western Medicine.

书籍目录
