<<中国推拿疗法>>

内容概要

Tuina is a simple therapy which uses neither medicine nor medical devices, but uses various massage techniques to stimulate the body to regulate the bodily functions and eliminate pathogenic factors. Originating in China tuina therapy has now been adopted in many countries around the world.

The author of Chinese Tuina Therapy Wang Fu has a relationship with traditional Chinese medicine since his early years. When he was twenty years old, he became seriously ill. The medicine to cure his illness caused a hearing loss in both ears. At that time, he resolved to be a doctor of traditional Chinese medicine. Because his deafness proved to be a hindrance in consultation and diagnosis, he resolved to learn massage therapy. Because of perseverance in study and boldness in exploration and practice, he ultimately became a well-known masseur. He first served as a masseur in the Hospital Attached to the Liaoning College of Traditional Chinese Medicine and later was responsible for Chinese Medicine of Liaoning magazine. The present book is a summary of his medical experiences during his professional career. The book includes thirty tuina manipulations and twenty-nine therapies for common diseases.

书籍目录

CONTENTS

Preface

Chapter One General Introduction

I. History of Tuina Therapy

II. The Basic Theory of Tuina Therapy

1. Origin of Tuina Therapy

2. The Theoretical Foundation of Tuina Therapy

3. Commonly-Used Meridians, Points and Their Indications

.II. Indications and Contraindications of Tuina Therapy

1. Indications

2. Contraindications, Precautions and Commonly-Used Points

I. Manipulations and Effects

II. Reinforcing and Reducing Manipulations

III. Thirty Maneuvers of Tuina Therapy

1. Stroking Maneuver

2. Pushing Maneuver

3. Grasping Maneuver

4. Pressing Maneuver

5. Palm-rubbing Maneuver

6. Rotatory Kneading Maneuver

7. Twisting Maneuver

8. Flicking Maneuver

9. Finger-rubbing Maneuver

10. Pick-up Maneuver

11. Pinching Maneuver

12. Rubbing Maneuver

13. Rolling Maneuver

14. Shaking Maneuver

15. Gripping Maneuver

16. Rotating Maneuver

17. Tapping Maneuver

18. Stretching Maneuver

19. Percussing Maneuver

20. Puncturing Maneuver

21. Separating Maneuver

22. Joining Maneuver

23. Back-carrying Maneuver

24. Holding Maneuver

25. Pulling Maneuver

26. Kneading Maneuver

27. Head-lifting Maneuver

28. Raising Maneuver

29. Lifting Maneuver

30. Stepping Maneuver

Chapter Three The Tuina Treatment of Commonly Encountered Disorders

I. Disorders of the Head and Face

1. Headache
2. Toothache
3. Facial Paralysis
4. Insomnia

II. Disorders of the Neck

1. Stiffneck
2. Cervical Spondylopathy

III. Periarthritis of the Shoulder

IV. Pain of the Upper Limbs

1. Brachialgia
2. Numbness and Pain of the Fingers
3. Tenosynovitis

V. Hypertension

VI. Coronary Heart Disease

VII. Hemiplegia

VIII. Abdominal Disorders

1. Stomach Pain
2. Abdominal Pain
3. Gastroptosis

IX. Lumbocrural Pain

1. Discussion of Lumbocrural Pain
2. Acute Traumatic Lumbago
3. Prolapse of Lumbar Intervertebral Disc
