## <<常见病的针灸疗法>>

### 内容概要

The therapy of acupuncture and moxibustion stimulates certain points on the human body with metallic needles and moxa, activating the meridians and collateral channels and regulating the function of the internal organs, qi and blood, so as to prevent and treat disease. This book describes how to treat common diseases with acupuncture and moxibustion. Any student or practitioner of acupuncture needs to know not only the meridians, collaterals, points and manipulations but also the essentials of traditional Chinese medicine. Clinically, it is important to follow the treatment determined by the symptoms.
