## <<赛诺沃汉字卡片>>

### 内容概要

The set of cards includes the 800 most commonly used Chinese characters. It will improve learners' ability to read and write Chinese characters efficiently. Words made up with the characters, and sentences made up with the words will deepen learners' understanding of the characters. It is suitable for non-native Chinese speakers and overseas Chinese.

Each character is accompanied by pinyin, illustrations, two or more words, and one sentence (mostly in the fields of daily life, study, entertainment, work, travel, and business), covering a vocabulary of

3,000 characters. The non-simplified form of the characters are also given for reference. (Simplified characters are mainly used in mainland China, while the non-simplified characters are still in use in many overseas areas. We suggest that learners study the simplified character, and have some knowledge of non-simplified characters.) Apart from 100 characters in each set, it also introduces some knowledge about pinyin, writing Chinese characters, Chinese numerals, measurements, proverbs, idioms, two-part allegorical expressions, and Tang poems.

The cards take the form of international standard playing cards. Each pack is easy to carry and use. One can have fun while studying.

This set of cards is accompanied by multimedia software. Animation, pictures, words, and sound make your study easy and vivid. It is just like a Chinese teacher who is by your side, teaching you to speak and write.
