<<语言中的文化>>

内容概要

Language and culture are closely interrelated. Language is the carrier of culture and culture is the soil of language. One is inseparable from the other. Therefore, it is impossible to learn a language well without the good command of its culture. This book is an endeavor to explore the cultural factors embodied in language. It is a contrastive study of cultural differences from the perspective of different levels of language, namely, vocabulary, syntax and text as well. This book intends to provide the basic knowledge about language and culture which is practical and helpful in the language learning. It will be of great use to advanced undergraduates, as well as English learners.
