## 内容概要

' Halliday's investigations into grammatical metaphor take us deeply into the way we construct and expand meanings, starting with representations of concrete experienced events and ending with theoretical worlds populated by abstract entities linked through generalized relations and causalities. He finds these processes most strikingly in the development of the modern sciences that have historically created robust virtual worlds of theory from observable material events. But he sees these same processes in all the meaning systems of modern life, whether law, bureaucracy, economics or arts. He sees the same processes of grammatical metaphor as children learn to participate in our built symbolic environment, particularly as they are introduced to these meaning systems in schools, an institution designed expressly for that purpose.'

#### 作者简介

Professor M.A.K.Halliday, was Foundation Professor of Linguistics at the University of Sydney until his retirement and has taught as Visiting Professor around the world As a seif-styled generalist he has published in many branches of linguistics.
