

<<现代通信最新技术>>

图书基本信息

书名：<<现代通信最新技术>>

13位ISBN编号：9787302028154

10位ISBN编号：730202815X

出版时间：1998-01

出版时间：清华大学出版社

作者：布莱克(美)

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

书籍目录

Contents
Preface xix
CHAPTER1 Introduction
Introduction
The Need for Enhanced Services
The Past
The Future Has Become the Present
Goals of the Emerging
Communications Technologies
LAN Interconnectivity
A Brief Summary
Need for Greater Communications Capacity
LAN and WAN Internetworking
Costs of Connecting Dispersed LANs
The Virtual Private Network (VPN)
Proposed Solutions
The Confusion Factor
Fast Relay Systems
Trends in Technology
Hardware and Software
New Technologies: To Use Them or Not
to Use Them?
Broadband Networks
Broadband Signaling Hierarchies
Applications Supported by the New Technologies
New Technologies: Competitive or Complementary?
Performance and Distance Considerations
Obtaining Services for the Networks:
Bandwidth on Demand
Where Services are Provided
Layered Architectures of the Emerging Technologies
Summary
CHAPTER2 Foundations for the Emerging Technologies
Introduction
Virtual Circuits
A Brief Digression
Permanent Virtual Circuit (PVC)
Switched Virtual Circuit (SVC) or Connection
on Demand
Semi-permanent Virtual Circuits (SPVC)
Connection-oriented and Connectionless Systems
Connection-orientated Systems
Connectionless Systems
The Pros and Cons
The Coexistence of Connection-oriented Systems

<<现代通信最新技术>>

and Connectionless Systems
Variable Bit Rate (VBR) and Constant Bit Rate (CBR) Applications
VBR Applications
CBR Applications
Flow Control and Congestion Management
Explicit Flow Control
Implicit Flow Control
No Flow Control
User Payload Integrity Management
Layered Protocols and Protocol Data Units
Addressing and Identification Schemes
Multiplexing Methodologies
Switching, Routing, and Relaying
Source and Non-source Routing
Fixed and Adaptive Routing
Network Interfaces
Convergence, Segmentation, and Reassembly Operations
Summary
CHAPTER3 Emerged Technologies
Introduction
T1/E1 CARRIER Systems
The Purpose of T1 and E1
"Typical" Topology
T1 and E1 Layers
T1/E1 PDUs
Conclusions on T1/E1
X.25
The Purpose of X.25
Typical Topology
X.25 Layers
X.25 PDUs
Other Noteworthy Aspects of X.25
Conclusions on X.25
ISDN
The Purpose of ISDN
Typical Topology
ISDN Layers
ISDN PDUs
Conclusions on ISDN
Signaling System Number 7 (SS7)
The Purpose of (SS7)
Typical Topology
887 Layers
887 PDUs
Conclusions on 887

<<现代通信最新技术>>

FDDI

The Purpose of FDDI

Typical Topology

The FDDI Layers

FDDIPDUs

Other Notable Aspects of FDDI

Conclusion on FDDI

Summary

CHAPTER4 Frame Relay

Introduction

The Purpose of Frame Relay

Pertinent Standards

Typical Frame Relay Topology

The Frame Relay Layers

Frame Relay and Its Relationship

to ISDN Layers

OSI and ANSI Layers

The Frame Relay Protocol Data Unit (PDU)

Frame Relay Operations in More Detail

The Frame Relay Core Functions

The Data Link Connection Identifier (DLCI)

Frame Relay Link Layer Error Checking

Potential Congestion Problems

Traffic Management

Consolidated Link Layer Management

(CLLM)

The Discard Eligibility Bit

Committed Information Rate

Leaking CIR and Fast Forward CIR

Classes of Service Using Bc and Be

DLCIs in More Detail

The Frame Relay Network-to-Network

Interface (NNI)

NNI Operations

Bellcore Exchange Access FR (XA-FR)

PVC Service

Other Notable Aspects of Frame Relay

DLCI Values

Added Options to Frame Relay

The Local Management Interface (LMI)

Frame Relay SVC Operations

Other Quality of Service (QOS) Options

Internetworking Frame Relay and ATM

Multiprotocol Operations over Frame Relay

The Frame Relay MIB

Frame Relay Worksheet

Summary

<<现代通信最新技术>>

CHAPTER5 Fast and Switched Ethernet

Introduction

Generations of LANs

First Generation

Second Generation

Third Generation

Fourth Generation

Switched Ethernet

Switched Ethernet Architecture

Store and Forward and Cut-through Switches 1

Virtual LANs

Fast Ethernet

IOOBASET

AnyLAN

Fast/Switched Ethernet Worksheet

Summary

CHAPTER6 Metropolitan Area Networks (MANs) and Switched

Multimegabit Data Service (SMDS)

Introduction

The Purpose of a MAN

Pertinent Standards

A Typical MAN Topology

Topology Reconfiguration with Self-Healing

Networks

The MAN Layers

MAN Protocol Data Units (PDUs)

MAN Operations in More Detail

The Access Unit (AU)

Overview of the DQDB Protocol

DQDB Counters

Location Discovery

Segmentation and Encapsulation Operations

Other Notable Aspects of the MAN

MAN Summary

Introduction to SMDS

The Purpose of SMDS

Pertinent Standards

A Typical SMDS Topology

SMDS Layers

SMDS Protocol Data Units

SMDS Operations in More Detail

Defining and Measuring Congestion

The Sustained Information Rate (SIR)

and Access Classes

SIP Segmentation and Encapsulation Functions

SNI Quality of Service (QOS) Operations

The Interchange Carrier Interface (ICI)

<<现代通信最新技术>>

Quality of Service (QOS) Objectives
Other Notable Aspects of SMDS
SMDS Address Management Operations
The ISSI
The Operations System/Network Element (OS/NE)
Interface (Operations Technology)
The SMDS MIB
MAN/SMDS Worksheet
SMDS Summary
CHAPTER7 Asynchronous Transfer Mode (ATM) 1
Introduction
The Purpose of ATM
Pertinent Standards
An ATM Topology
The VPI and VCI Labels
ATM Layers
ATM and the B-ISDN Model
ATM Protocol Data Units (Cells)
ATM Operations in More Detail
Physical Layer Interfaces
ATM over Copper
Rationale for the Cell Size
Network Transparency Operations 202
ATM Labels
Multiplexing VCIs and VPIs
ATM Connections on Demand
ATM Switching
Classes of Traffic
AAL Types
Traffic Management in an ATM Network
ATM Forum and ITU-T Traffic Control
and Congestion Control
The ATM B-ISDN Intercarrier Interface (B-ICI)
Physical Layer Requirements at the B-ICI
Traffic Management at the B-ICI
Reference Traffic Loads
B-ICI Layer Management Operations
Other Notable Aspects of ATM
Addressing in an ATM Network
Network Management
The ATM MIB
ATM Worksheet
Summary
CHAPTER8 Synchronous Optical Network (SONET)/
Synchronous Digital Hierarchy (SDH)
Introduction
Purpose of SONET/SDH

<<现代通信最新技术>>

Synchronous Networks
Pertinent Standards
Typical SONET/SDH Topology
SONET/SDH Layers
SONET/SDH in More Detail
Automatic Protection Switching (APS) ;
The SDH Multiplexing Structure
Payloads and Envelopes
Payload Pointers
Examples of Payload Mapping
Mapping and Multiplexing Operations
Error Checking, Diagnostics, and Restoration
The Control Headers and Fields
SONET/SDH Equipment
Other Notable Aspects of SONET/SDH
Operation Administration and Maintenance
(OAM) Operations
Progress in SONET/SDH Penetration
SONET/SDH Worksheet
Summary
CHAPTER9 Mobile Communications Technologies
Introduction
The Purpose of Mobile Communications Systems 7
Typical Cellular Systems Topology
Cellular Systems Operations in More Detail
Cellular System Types and Market Penetration 3
GSM
GSM Interfaces
Call Routing
Location Updating
GSM 900/DC1800: Foundation for PCS 1900
(TDMA)
CDMA: A New Arrival into the Commercial
Mobile, Wireless World
TDMA versus CDMA
Cordless Systems Operations in More Detail
CT2
DECT
Other Standardization Efforts for PCS
The Auctions in the U.S. and the PCS Marketplace 31
Candidates for PCS Technologies
The Cellular Digital Data Packet System
Specification (CDPD)
CDPD Services and Servers
Third-Generation Mobile Systems
Some Concluding Thoughts
Mobile Communications Systems Worksheet

<<现代通信最新技术>>

Mobile Communications Summary
CHAPTER10 Residential Broadband
Introduction
The Problem with the Subscriber Loop
The Proposed Solutions: Two Interlocking Approaches,
Coding/Modulation and Wiring
How Much Bandwidth Is Needed to Satisfy
the Subscriber?
Downstream Bandwidth
Upstream Bandwidth
Beyond the Coding/Modulation and Wiring:
Service Provisions
Switched Digital Video (SDV)
Coding and Modulation
HDSL
ADSL
Wiring at the Local Loop: Subscriber Loop Options
Hybrid/fiber Copper (HFCop)
Hybrid/fiber Coax (HFC)
Fiber to the Curb (FTTC) and Fiber to the
Home (FTTH)
The Wireless Option
Managing the Broadband Signals
Bellcore's TR-303 Specification
Residential Broadband Worksheet
Summary
Appendix IOA: Coding and Modulation Techniques
for Residential Broadband
Introduction
Quadrature Amplitude Modulation (QAM)
Examples of Modulation Schemes and Bit Rates
Carrierless Amplitude/Phase Modulation (CAP)
CHAPTER11 Broadband Signaling Networks
Introduction
What Are Broadband Signaling Networks?
Differences between Broadband and Conventional
Signaling Systems
N-ISDN and B-ISDN
Example of a Broadband Signaling Network Operation
Examples of Services Provided
by the Broadband Network
ISO 9577
ATM Parameters
The Broadband Signaling Protocols
How the Broadband Signaling Stacks Operate
Broadband Signaling Worksheet
Summary

<<现代通信最新技术>>

CHAPTER12 Advanced Intelligent Network

Introduction

Operator Services Systems (OSS)

The 800 Service-Inklings of an Advanced Intelligent Network (AIN)

Key Aspects of the AIN

The Intelligent Network and the Advanced Intelligent Network

Distribution of Functions

Evolution to the AIN

Other Parts of the AIN

Example of an AIN Operation

The AIN Basic Call Model

Standardized Messages

The Private Virtual Network

AIN Worksheet

Summary

CHAPTER13 Internet Protocol, Version 6 (IPv6)

Introduction

Functions of the Internet Protocol (IPv4)

The IP Address

Problems with IP and the IP Address

The Solution--an Expanded IP Address

Space

Alternatives to the Overhead of IPv6

Addresses

The Next Generation IP-IPv6

Functions of the IPv4 Header Fields 84

Functions of the IPv6 Header Fields 187

IPv6 and ATM

Fixed Routing and Virtual Circuits 1

Supporting Different Types of Traffic 889

The IPv6-ATM Debate

IPv6 Worksheet

Summary

APPENDIX A Tutorial on Communications Networks

Introduction

Data Communications Networks

Classifying Networks

Wide Area and Local Area Networks

Network Components

Voice Networks

Nonhierarchical Routing

History of and Inherent Problems with Coexistence of Analog and Digital Systems

Analog-to-Digital Conversion

Data Images over Voice Channels

<<现代通信最新技术>>

FDM, TDM, and STDM

Circuit, Message, Packet, and Cell Switching

Network Routing Operations

The Challenge of Integrating Voice, Data,
and Video Applications

Fast Packet Switching (FPS)

Hybrid Switching

APPENDIXB Layered Protocols, OSI, and TCP/IP

Introduction

Protocols and the OS1 Model

OS1 Layer Operations

The Internet Protocols (TCP/IP)

The Internet Layers

IP Functions

TCP Operatlons

APPENDIXC Management Information Bases (MIBs)

Introduction

Purpose of a MIB

Examples of MIB Objects and Other Entries 436

APPENDIXD EmergIng Communications

Technologles Worksheet

Abbreviations
