书籍目录

Contents  
CHAPTER 1 The Function of Financial Markets  
Savings-Investment Foundation  
Efficiency of Financial Markets  
Stages of Efficiency  
Financial Assets  
The Role of Financial Intermediaries  
Disintermediation and Securitization  
Country Efficiency  
Financial Innovation  
The Catalyst for Change  
Types of Innovations  
The Implications of Savings  
Degrees of Moneyiness  
Interest Rates and Arbitrage Efficiency  
Summary  
Selected References  
CHAPTER 2 The Flow-of-Funds System  
The Structure of the System  
Sectoring  
Source and Use Statements  
The Preparation of a Matrix and Its Use  
Federal Reserve Flow-of-Funds Data  
Credit Flows  
Implications of Analysis  
Summary  
Selected References  
CHAPTER 3 Foundations for Interest Rates  
The Interest Rate in an Exchange Economy  
The Individual Choice  
Optimum with Exchange  
Combined Effect  
Market Equilibrium  
Interest Rates in a World with Risk  
Behavior of Individual Economic Units  
Utility for Financial Assets  
Utility for Financial Liabilities  
Utility for Other Assets  
Market Equilibrium  
Maximizing Utility for the Economic Unit  
The Action of All Economic Units  
Summary  
Appendix: The Equilibrium Prices of Financial Assets  
Market Equilibrium: Two Economic Units  
Market Equilibrium: Multiple Financial Assets

<<财金之旅>>

Selected References

CHAPTER 4 Prices and Yields for Bonds and Money

Market Instruments

Review of Present Values

Annuities

Present Value When Interest Is Compounded More Than

Once a Year

Continuous Compounding

The Price of a Bond

Coupons and Principal Payments

Price When Next Coupon Payment Is Less Than Six

Months Away

Zero-Coupon Bonds

Yield Calculations for Bonds

Implicit Reinvestment Rate Assumption

Current Yield

Holding Period Return

Yield-to-Maturity for Zero-Coupon Bonds

Yield for Perpetuities

Money Market Instrument Returns

Bank Discount Rate

Implications

Summary

Selected References

CHAPTER 5 Inflation and Returns

The Historical Record in Brief

The Nature of Inflation Premiums

Unanticipated Inflation

The Fisher Effect

Nominal Interest Rates and Inflation, Theoretically

Empirical Evidence on Nominal Interest Rates

Problems in Empirical Testing

Testing for the Effect of Inflation

The Fisher Effect More Directly

A Summing Up

Nominal Contracting Effects

Debtor-Creditor Claims

Depreciation

Inventories

Corporate Value

Empirical Testing

Inflation Indexed Bonds

The Mechanics

Other Aspects

Summary

Selected References

CHAPTER 6 The Term Structure of Interest Rates

## &lt;&lt;财金之旅&gt;&gt;

Definition of Term Structure  
The Pure Expectations Theory  
Forward Rates of Interest  
Substitutability of Maturities  
Technical Problems  
Arbitrage and Market Efficiency  
Uncertainty and Term Premiums  
Market Segmentation  
Cox-Ingersoll-Ross Theory  
General Equilibrium Notions  
Term Structure Implications  
Other Models of the Term Structure  
Multifactor Models  
Lattice-Type Models  
Empirical Evidence  
Summary  
Selected References  
CHAPTER 7 Price Volatility, Coupon Rate, and Maturity  
The Coupon Effect  
Sensitivity of Price to Various Properties  
The Duration Measure and Its Changing Behavior  
Relationship between Duration and Maturity  
Relationship between Duration and Coupon Payment  
Relationship between Duration and Changes in Interest Rates  
Volatility Duration  
Modified Duration Formula  
Convexity  
The Convexity Measure  
Illustration of Price-Change Estimates Using Modified Duration and Convexity  
Further Observations on Convexity  
Immunitization of Bond Portfolios  
Immunitization with Coupon Issues  
An Illustration  
Fisher-Weil Duration  
Mapping the Stochastic Process  
Testing for Immunitization Effectiveness  
Additional Immunitization Considerations  
Equilibration between Coupon and Noncoupon Bond Markets  
Coupon Stripping  
Term Structure of Pure Discount Bonds  
Arbitrage Efficiency between the Markets  
Summary  
Selected References  
CHAPTER 8 The Default-Risk Structure of Interest Rates  
Promised, Realized, and Expected Rates  
Distribution of Possible Returns

<<财金之旅>>

Empirical Evidence on Default Losses  
 Credit Ratings and Risk Premiums  
 Some Studies of Bond Ratings  
 Cyclical Behavior of Risk Premiums  
 The Market Segmentation Effect  
 Speculative-Grade (Junk) Bonds  
 Development of the Market  
 Issuers and Use in Acquisitions  
 Risk versus Return  
 Event Risk  
 Risk Structure and the Term Structure  
 Empirical Evidence  
 Summary  
 Selected References  
 CHAPTER 9 Derivative Securities: Interest-Rate Futures  
 Introduction to Contract  
 Features of Futures Markets  
 Money Market Instruments  
 Contents VII  
 Margin Requirements  
 Marking-to-Market and Price Movements  
 Longer-Term Instruments  
 Quality Delivery Options  
 Hedging and Speculation  
 Some Hedging Fundamentals  
 Futures and Spot Prices  
 Long Hedges  
 Hedge Ratios  
 Short Hedges  
 Basis Risk  
 More on Basis Risk  
 Sources of Basis Risk  
 Market Efficiency  
 Possible Reasons for Deviation of Forward  
 and Futures Rates  
 Summary  
 Selected References  
 CHAPTER 10 Derivative Securities: Options  
 Option Valuation  
 Expiration Date Value of an Option  
 Valuation Prior to Expiration  
 Hedging with Options  
 Black-Scholes Option Model  
 Debt Options  
 Features of Futures Options  
 Use of Debt Options  
 Caps, Floors, and Collars

<<财金之旅>>

Valuation of Debt Options  
 Yield Curve Options  
 Convertible Securities  
 Conversion Price/Ratio  
 Debt Plus Option Characteristic  
 Value of Convertible Securities  
 Premiums  
 Other Reasons for Premiums  
 Summary  
 Appendix A: Put-Call Parity  
 Appendix B: Application of Option Pricing Concepts to Valuing  
 Convertible Securities  
 Selected References  
 CHAPTER 11 Derivative Securities: Swaps  
 Swap Features  
 An Illustration  
 Valuation Issues  
 Comparative Advantage  
 Completing Markets  
 Default Risk  
 Skirting Tax Laws and Regulations  
 Swap Valuation: A Summing Up  
 Credit Risk, Maturity, and Systemic Risk  
 Default Provisions  
 Value at Risk  
 Secondary Market Values  
 Swaptions  
 Summary  
 Selected References  
 CHAPTER 12 Embedded Options and Option-Adjusted  
 Spreads  
 Option-Adjusted Spreads  
 The Basic Methodology  
 An Illustration  
 Some Caveats  
 The Nature of the Call Feature  
 Forms of the Provision  
 Redemption versus Callability  
 Puttable Bonds  
 The Call Feature's Valuation  
 Interest-Rate Expectations  
 The Call Feature and Convexity  
 Valuation in an Option Pricing Context  
 Empirical Evidence on Call Valuation  
 The Sinking Fund  
 Characteristics of the Provision  
 Value of the Sinking Fund

## &lt;&lt;财金之旅&gt;&gt;

Empirical Evidence

Summary

Selected References

CHAPTER 13 Mortgage Securities and Prepayment Risk

Some Features of Mortgages

Mortgage Pass-Through Security

Agency Pass-Throughs

Nonagency Pass-Throughs

Mortgage Derivatives

Collateralized Mortgage Obligations (CMOs)

Planned Amortization Class (PAC) and Targeted Amortization

Class (TAC) Securities

Stripped Mortgage-Backed Securities

Floater and Inverse Floaters

Prepayment Option and Its Valuation

Prepayment and Convexity

Measures of Prepayment

Coupon Rate and Age

Additional Factors Explaining Prepayment

Modeling Prepayment Experience

Option-Adjusted Spread Approach

Prepayment Behavior of Certain Derivatives

Planned Amortization Class Securities

Interest Only (IOs), Principal Only (POs) and Residual Class Securities

Other Asset-Backed Securities

Summary

Selected References

CHAPTER 14 Controlling Currency Risk

Risk and Return from Foreign Investment

Exchange Rate Risk Management

Forward Exchange Market

Illustration of Spot and Forward Exchange Rates

A Single European Currency (Euro)

Underlying Relationships

The Law of One Price

Purchasing Power Parity

Interest-Rate Parity

Covered Interest Arbitrage

Interest-Rate Parity Approximation

Empirical Evidence Concerning Interest-Rate Parity (IRP)

Other Ways to Shift Risk

Currency Futures

Currency Options

Currency Swaps

Currency/interest-Rate Swaps

Valuation Implications

The Amount to Hedge

<<财金之旅>>

A Free Lunch?  
 The Cost of Currency Hedging  
 Black's Universal Hedging  
 Closing Thoughts  
 Some Institutional Characteristics  
 Euro and Foreign Bonds  
 Currency-Option and Multiple-Currency Bonds  
 Summary  
 Selected References  
 CHAPTER 15 The Influence of Taxes  
 Tax Treatment of Capital Gains  
 Original Issue Discount (OID) Bonds  
 Capital Gains Treatment for Taxable Coupon Bonds  
 The De Minimis Rule  
 Capital Gains Treatment for Municipal Bonds  
 Tax Timing Options  
 Municipal Bonds and the Taxation of Interest Income  
 Taxable versus Tax-Exempt Yields  
 The Nature of the Municipal Market  
 Value of the Tax Exemption Feature  
 Variation of Implied Tax Rate  
 The Effect of Tax Reform and Supply  
 Implied Tax Rate and Maturity  
 Preferred-Stock Tax Effects  
 Straight Preferred-Stock Investments  
 Auction-Rate Preferred Stock  
 Summary  
 Selected References  
 CHAPTER 16 The Social Allocation of Capital  
 The Issues Involved  
 Ceilings on Borrowing Costs  
 The Effect of Usury Laws  
 The Negatives of Interest-Rate Ceilings  
 Government Guarantees and Insurance  
 The Transfer of Underlying Risk  
 Option-Pricing Valuation  
 Interest-Rate Subsidies  
 The Effect of the Subsidy  
 Effectiveness of the Subsidy  
 Financial Intermediation Through Borrowing and Relending  
 The Situation Illustrated  
 The Effect of Government Intermediation  
 Regulations Affecting Investor and Borrower Behavior  
 The Effectiveness of This Approach  
 The Costs to Society  
 Qualification for Tax-Exempt Financing  
 Benefits, Costs, and Externalities

<<财金之旅>>

Policy Implications

Summary

Selected References
