<<对象模型>>

内容概要

本书以5个有代表性的真实应用(3个为商业应用：Connie便利店自动收款机应用系统、Walley仓库管理应用系统和Ollie订购应用系统，2个为实时控制应用：Dani分流系统和Andi自动驾驶系统)为例，阐述了如何创建有效的对象模型。

在介绍这些应用过程中引入的177个策略和31种模型，可以直接应用于实际的系统建模之中，也可作为读者仿效的模板，为读者创建自己的对象模型提供了理论和实用的参考。

本书可作为面向对象设计方法的参考用书，无论对学习面向对象开发的学生，还是进行实际开发的技术人员都有着很好的指导价值。
