<<面向服务的通信体系结构>>

内容概要

本书全面介绍了新兴的面向服务的电子通信体系。

信息技术的高速发展使已往的高难计算逐渐变成越来越普及的电子服务，Web服务已日益盛行，传统的电信服务也越来越多地通过因特网来提供。

本书介绍了面向服务的软件体系结构的最新发展，提供在因特网终端获取电信网服务的基本技术，并展示了将现有的电信服务全面Web化的最新研究成果。

作者以网络电话作为 Web服务的一个特例来讨论新技术的发展和日渐统一的因特网和电信网。

<<面向服务的通信体系结构>>

书籍目录

Foreword
The Authors
Acknowledgements
List of Abbreviations and Symbols
1 Introduction 1.1 The Evolution of Internet Telephony 1.2 Problem Statement 1.3 Solutions
2 Internet Telephony : The Evolution to a Service-Oriented Architecture 2.1 Introduction 2.2 Service Architecture for Traditional Telephone Network 2.3 Internet Services Architecture 2.4 Requirements of a Telecommunications SOA 2.5 Conclusion
3 Background : Providing Telephony Service 3.1 Service Architecture for the Wireline Public Switched Telephone Network 3.2 Service Architecture for the Cellular Public Switched Telephone Network 3.3 Service Architecture for Internet Telephony
4 Comparative Analysis of Signaling Protocols 4.1 Desirable Properties of a Candidate Protocol 4.2 Protocols Evaluated 4.3 Comparative Analysis 4.4 The Novel SIP-Based Approach
5 Crossover Services Originating on the Internet 5.1 Introduction 5.2 Motivation 5.3 Call Model Mapping with State Sharing 5.4 Implementing CMM/SS 5.5 Results from CMM/SS 5.6 Performance of CMM/SS 5.7 CMM/SS : A General Solution 5.8 Limitations of CMM/SS 5.9 Related Work 5.10 Conclusion
6 Crossover Services Originating on the Public Switched Telephone Network 6.1 Introduction 6.2 Architecture for PSTN-Originated Crossover Services 6.4 An XML Schema to Represent Events in the PSTN 6.5 Proposed Extensions to SIP 6.6 Examples 6.7 A Taxonomy of PSTN-Originated Crossover Services 6.8 SIP : The Distributed Middleware 6.9 Related Work 6.10 Conclusion
7 Smart Spaces in the Telecommunications Domain 7.1 Introduction 7.2 Research Thrusts of Pervasive Computing 7.3 Implementing a Telecommunications Smart Space 7.4 Design and Implementation of the Event Manager 7.5 Performance Analysis of the Event Manager 7.6 Related Work 7.7 Conclusion
8 Conclusions
Appendix A The SPIRITS (Services in PSTN Requesting Internet Services) Protocol
Appendix B Interworking SIP and Intelligent Network Applications
Appendix C XML Schema for PSTN Events
Appendix D XML Schema for SMS to IM
Appendix E Raw Data for Event Manager Performance Analysis
Bibliography
