

<<第7届亚太生物信息学大会论文集>>

图书基本信息

书名：<<第7届亚太生物信息学大会论文集>>

13位ISBN编号：9787302190486

10位ISBN编号：7302190488

出版时间：2009-1

出版时间：张、沃特曼、张学工 清华大学出版社 (2009-01出版)

内容概要

《第7届亚太生物信息学大会论文集(英文版)》的主要内容是：This is the Proceedings Volume for the 7th Asia-Pacific Bioinformatics Conference (APBC2009) which was held in Beijing, China in January 2009. This series of influential conferences with strong international participation was begun in 2003 in Adelaide, Australia. It has been central in creating an Asian-Pacific community of scientists who are using computational methods to study the rapidly emerging data from modern biology and genomics.

作者简介

作者：(美国)张 沃特曼 张学工

书籍目录

A - DNA sequence processing
A1. Sequence alignment and evolution
A2. Sequence assembly
B - Expression and regulation
B1. Gene expression, microarray data analysis and disease classification
B2. Gene regulation
C - non-coding RNAs
C1. miRNAs and RNAi
C2. RNA structure
D - Proteins and proteomics
D1. Protein structure, location and function
D2. Mass spectrometry data processing
E - Pathways and networks
E1. Pathways
E2. Networks and systems biology
F - Genomic variations and complex diseases
F1. Disease classification and metabolism modeling
F2. Association study and genomic variation
