## <<基于项目的管理手册>>

### 前言

近二十多年来是国际项目管理理论和方法大发展的时代，也是中国项目管理发展的关键阶段。在国际领域，一大批学者和项目管理专业组织致力于建立与完善项目管理学科体系，扩大项目管理应用范围；在国内，各类建设项目纷纷上马，极大地丰富与加快了我国项目管理的发展进程。自1991年中国第一个全国性、跨行业的专业学术组织——中国（双法）项目管理研究委员会（PMRC）成立以来，众多的专家学者努力普及项目管理知识，广泛开展国际交流，使我国项目管理大踏步地进入了国际舞台。

在这个项目管理大发展的时代，涌现出了众多卓越的项目管理专家。

在项目管理学术界享有很高国际声誉的罗德尼·特纳（Turner, John. Rodney）教授就是其中的一位杰出代表。

他的14本项目管理著作影响了众多的项目管理人员和企业管理人员，现在奉献在读者面前的The Handbook of Project-Based Management: Leading Strategic Change in Organizations（《基于项目的管理手册——领导组织级战略变革（第3版）》）就是他的代表作之一。

这是一本21世纪最新的项目管理手册和指南，它包括了管理项目绩效的知识体系、方法、流程和工具；它扩展了项目生命周期理论，并强调各种不同行业的项目特点以及该如何应用项目管理。

不仅如此，特纳教授还阐述了许多关于组织战略设计、利益相关者管理以及如何发展企业级项目管理能力的方法。

他以全新的视角重新阐释组织级项目管理的重点，由分离的流程与行政管理转型为全面的项目治理，并紧密地与公司治理结构相结合。

在这次2009年的新版中，提出了项目管理的重点由“完成组织目标”扩展到“赢得组织级战略变革成功”这一全新理念。

特纳教授特别强调了以项目管理带动全过程的组织变革，项目来源于组织变革的需求，也是实现组织变革的战略手段，项目完成后更要将变革成果深深根植于组织的结构和日常运营之中，从而持续提高组织绩效。

## 书籍目录

Preface Acknowledgments Chapter 1: Leading Change through Projects 1.1 Projects and their Management 1.2 The Process Approach 1.3 The Management of Projects and this Book 1.4 Images of Projects Summary References Part 1: Managing the Context Chapter 2: Projects for Delivering Beneficial Change 2.1 Identifying the Need for Performance Improvement 2.2 Diagnosing the Change Required 2.3 The Benefits Map 2.4 Projects for Implementing Corporate Strategy Summary References Chapter 3: Project Success and Strategy 3.1 Project Success Criteria 3.2 Key Performance Indicators 3.3 Project Success Factors 3.4 The Strategic Management of Projects 3.5 Principles of Project Management Summary References Chapter 4: The People Involved 4.1 Reactions to Change 4.2 Managing Stakeholders 4.3 Communicating with Stakeholders 4.4 Project Teams 4.5 Leading Projects Summary References Part 2: Managing Performance Chapter 5: Managing Scope 5.1 Principles of Scope Management 5.2 Project Definition 5.3 Planning at the Strategic Level: Milestone Plans 5.4 Planning at Lower Levels 5.5 Applications Summary References Chapter 6: Managing Project Organization 6.1 Principles 6.2 The External Organization 6.3 The Internal Organization 6.4 Responsibility Charts Summary References Chapter 7: Managing Quality 7.1 Quality in the Context of Projects 7.2 Achieving Quality on Projects 7.3 Configuration Management Summary References Chapter 8: Managing Cost 8.1 Estimating Costs 8.2 Types of Costs 8.3 Estimating Techniques 8.4 Controlling Costs: Obtaining Value for Money Summary References Chapter 9: Managing Time 9.1 The Time Schedule 9.2 Estimating Duration 9.3 Calculating the Schedule with Networks 9.4 Resource Histograms and Resource Smoothing 9.5 Controlling Time Summary References Chapter 10: Managing Risk 10.1 The Risk Management Process 10.2 Identifying Risk 10.3 Assessing Risk 10.4 Analyzing Risk 10.5 Managing Risk Summary References Part 3: Managing the Process Chapter 11: The Project Process 11.1 The Project and Product Life Cycle 11.2 The Feasibility Study 11.3 The Design Phase 11.4 New Product Development 11.5 Concurrent Engineering 11.6 Information Systems Projects Summary References Chapter 12: Project Start-Up 12.1 The Start-Up Process 12.2 Start-Up Workshops 12.3 Project Definition Report and Manual Summary References Chapter 13: Project Execution and Control 13.1 Resourcing a Project 13.2 Implementation Planning 13.3 Allocating Work 13.4 Requirements for Effective Control 13.5 Gathering Data and Calculating Progress 13.6 Taking Action Summary References Chapter 14: Project Close Out 14.1 Timely and Efficient Completion 14.2 Transferring the Asset to the Users 14.3 Embedding the Change and Obtaining Benefit 14.4 Disbanding the Team 14.5 Postcompletion Reviews Summary References Part 4: Governance of Project-Based Management Chapter 15: Project Governance 15.1 Governance 15.2 Governance of the Project 15.3 The Principal-Agent Relationship 15.4 Communication between the Project Manager and Sponsor Summary References Chapter 16: Program and Portfolio Management 16.1 Definitions 16.2 Managing Portfolios 16.3 Managing Programs 16.4 The Project Office Summary References Chapter 17: Developing Organizational Capability 17.1 Defining Capability 17.2 Developing Individual Competence 17.3 Developing Organizational Capability 17.4 Improving Organizational Capability 17.5 Knowledge Management 17.6 Competency Traps Summary References Chapter 18: Governance of the Project-Based Organization 18.1 Governance of Project Management 18.2 Conducting Audits 18.3 Conducting Health Checks 18.4 End-of-Stage Reviews Summary References Chapter 19: International Projects 19.1 Types of International Project 19.2 The Problem of International Projects 19.3 Managing Culture Summary References Chapter 20: Epilogue 20.1 Principles of Project Management 20.2 Key Success Factors Appendix A: Project Definition Report for the CRMO Rationalization Project Appendix B: Project Control Documents for the CRMO Rationalization Project Subject index Author and Source Index Project Index

章节摘录

插图：In forming the project team, the project manager brings together a group of people and develops amongst them a perceived sense of common identity, so that they can work together using a set of common values or norms to deliver the project's objectives. Charles Handys says this concept of perceived identity is critical to team formation; without it the group of people remain a collection of random individuals. What sets project teams apart is that a group of people, who may never have worked together before, have to come together quickly and effectively in order to achieve a task which nobody has done before. The novelty, uniqueness, risk, and transience are all inherent features of projects (Chap. 1). Because the team is novel, it has no perceived identity, ab initio, and no set of values or norms to work to. It takes time to develop the identity and norms, which delays achievement of the team's objective. Furthermore, because the objective is novel, and carries considerable risk, it takes time to define, and, if the project is to be successful, this must be done before the team begins to function effectively.
