

<<SAP HANA内存计算技术项目实战指>>

图书基本信息

书名：<<SAP HANA内存计算技术项目实战指南>>

13位ISBN编号：9787302306344

10位ISBN编号：7302306346

出版时间：2012-11

出版时间：清华大学出版社

作者：潘明惠，徐莲荫等著

页数：366

内容概要

Based on HANA project experience with 36 validation scenarios of in-memory computing technology accumulated by large power companies , this book consisting of 12 chapters , describes in a detailed way how to use SAP HANA to meet query and analysis needs from business application systems; how to choose business and capture real-time data for decision-making analysis and business information query under the underserved circumstance; how to make use of a variety of modelling tools offered by HANA for modelling; how to choose a presentation tool to complete analysis report; how to obtain the balance between models and analytical tools for better analytical performance; how to deploy the roll-out; how to manage , run and maintain the system after the roll-out; and the management priorities of the HANA executive project.

作者简介

Pan Minghui is CIO of Liaoning Electric Power Company , senior engineer with Ph.D. degree , adjunct professor of Harbin Institute of Technology , outstanding expert of SGCC , member of Liaoning Provincial Committee of Experts on information technology , and member of Experts on major National Scientific and Technological Project. Dr. Pan has won 1 First National Scientific and Technological Progress Prize , 1 Second Prize and 19 other provinces and ministerial level awards. He has published 42 scientific papers and Engineering of Information Network Security Theories and Applications , Informationlization Engineering Theories and Applications , 200 Questions and Answers for Informationlization Engineering Technology , Introduction to Knowledge of Computer and Information Network , Experience of Electric Power Industry , SAP HANA Project Implementation Guide and SAP ERP Exam Questions Inventory 7 books.

书籍目录

Chapter 1 Introduction Chapter 2 Evolution of Computer and Origin of In-memory Computing Technology 2.1 Evolution of Computer 2.1.1 Changes of Generations of Computer 2.1.2 Development of Processor 2.1.3 History of Memory 2.2 Origin of In-memory Computing Technology 2.2.1 Business Needs 2.2.2 Development of Hardware 2.2.3 Software Technology Innovation 2.3 Conclusions Chapter 3 Features of SAP HANA In-memory Computing Technology 3.1 Profiles of Main In-memory Computing Technology Products 3.1.1 SAP HANA 3.1.2 Oracle Exalytics 3.1.3 Oracle Times Ten 3.1.4 IBM Solid DB 3.2 Characteristics of SAP HANA memory technology 3.2.1 Efficient Parallel Processing Mechanism 3.2.2 Memory-based Efficient Data Read and Process 3.2.3 Efficient Data Compression to Optimize Memory Utilization 3.2.4 Row-column Storage Mixed-mode 3.2.5 Virtual Modelling to Reduce Data Redundancy 3.2.6 Data-intensive Computing at the Database Layer 3.2.7 Other Characteristics of SAP HANA 3.3 Conclusions Chapter 4 Basic Knowledge of SAP HANA In-memory Computing Technology Application 4.1 SAP HANA Appliance Architecture 4.1.1 HANA In-memory Computing Engine 4.1.2 HANA Studio 4.1.3 Presentation Layer of HANA 4.1.4 HANA-Enabled Data Sources 4.2 SAP HANA Applicable Hardware Servers 4.2.1 SAP HANA Applicable Platform Requirements 4.2.2 Explanation of Adaptability of SAP HANA to P7704 4.2.3 Instruction of Support of HANA to Superdome and rx864 4.2.4 Conclusions of Analysis on SAP HANA Applicable Platform 4.3 SAP HANA Studio (HANA Studio) 4.3.1 System Requirements 4.3.2 Enabling Platforms 4.3.3 Functions of HANA Studio 4.4 SAP HANA Reporting Presentation Tools 4.4.1 HANA Database Access Interfaces 4.4.2 HANA Reporting Presentation Tools 4.5 SAP HANA Application Restrictions Chapter 5 Data Extraction Mechanism of SAP HANA 5.1 Trigger-Based Replication-SLT Data Synchronization 5.1.1 Initialization Import 5.1.2 Incremental Updating 5.1.3 SLT Data Synchronization Features 5.2 ETL-Based Replication-DS Data Synchronization 5.2.1 Data Service Modelling Tools 5.2.2 Data Initialization Import and Incremental Updating 5.2.3 Features of DS Data Synchronization 5.2.4 Components Required by ETL-Based Data Synchronization 5.3 Log-Based Replication-SRS Data Synchronization 5.3.1 Data Initialization Import and Incremental Updating 5.3.2 Features of SRS Data Synchronization 5.3.3 Components of Log-Based Data Synchronization 5.4 Comprehensive Comparison of Three Data Replication Technologies Chapter 6 System Security and Privilege Management of SAP HANA 6.1 User Management and Authentication 6.1.1 User Management Tools and Validation 6.1.3 Standard Users and Roles 6.2 Authorization 6.2.1 Authorization Concepts Chapter 7 SAP HANA Modelling Techniques Chapter 8 Applications of SAP HANA In-memory Computing Technology Chapter 9 SAP HANA PoC Project Conducted by LNEPC Chapter 10 Project Management of SAP HANA Implementation Chapter 11 SAP HANA System Building Chapter 12 Experience and Recommendations on SAP HANA System Reference Appendix 1 Manual for HANA System Server Installation Appendix 2 Manual for Installation of HANA Studio and BO 4.0 Client Appendix 3 Manual for HANA-SLT data provisioning training Appendix 4 Manual for HANA Modelling Operation Appendix 6 Manual for System Deployment-Production System Preparation
