章节摘录

Ready must you be to burn yourself in your own fire; how could you become new if you have not become ashes first ?

You, who run after the youth, go the way of creating one. You should create a God by the seven devils of yourself !

You, who understand the youth, go the way of the loving one: you love yourself, and on that account despise yourself, as only the loving ones despise. With your love and your creating, go into your youth, my brother, and the value will go with you. With your tears, go into your youth, my brother. I love him who is willing to create and beyond himself though he might be destroyed thus !

Ladies and gentlemen, Today, we will talk about the "youth" together. What does youth mean ?

What should we face in our youth ?

How to make your youth colourful ?

The three problems will be the topic of my talk !

First, what does youth mean ?

If you are teenagers, of course, you are in youth. If you are thirty, you also can say, "I'm in youth" !

The age isn't a limit any more. However, maybe the teenagers' youth is most brilliant !

So, congratulations !

Everybody——my friends !

What should we face in our youth ?

This is an intricate problem. Youth is a time when many people rebel against their parents. Many people don't know how to get on well with their family. Or sometimes, it seems that they know what to do when they are facing their own problem but in fact, they hardly have any ideas because of their blindness.
