<<校园英语演讲>>

内容概要

如果说语言的出现将人类文明的夜幕撕去了一角，那么，演讲就是这一角里漏出的月光。站在21世纪舞台上的《英语演讲丛书：校园英语演讲》，以其完美的行文、生动的说理、犀利的思想、澎湃的激情穿过时间的隧道，来到当代大学生的身旁。它针对大学生的所思所感，以一种最直接的表达方式和交流手段，引经据典，直抒胸臆，以肺腑之言，所选篇章或慷慨激昂，或深沉悲壮，或委婉含蓄，或清新淡雅，或幽默风趣，或潇洒飘逸……给奋斗者以力量，给脆弱者以刚强，给蒙昧者以启迪，给迷惘者以路标。英语演讲，给青春的校园注入了时代的音符、艺术的绝唱、文化的结晶，洒下一片永恒的月光。

书籍目录

情绪校园篇1.We Are Full of Excitement for the Future2.Enjoy Yourself While Fulfilling Responsibility3.Freshman Orientation Day Address4.I Share Your Sense of Apprehension and Melancholy5.Yale Time6.Minds Moving7.Your Age of Discovery8.On Playing Your Roles9.Preparing for a New Millennium10.On Making Choices11.The Spirit of Adventure12.Concerning Culture and Cultures13.Resilience14.Learning through Challenge15.Leaps of Faith16.Cet to Know This Superb Faculty17.Orientation Diriner Speech
岁月如梭篇1.I Fell in Love with You at First Sight2.I'd Like to Be Your Tourist Guide3.Things about Me4.My Family and I5.A Memorable Tour6.The Charming Aspects of Education7.More Exciting Second Half of Life8.Always Hold Your Youthfulness and Your Beauty9.Friendship Is Priceless10.Blessings Manifold11.Dedicated Teachers:Leadjng Us through New Century12.You Bring So Much Happiness to Ordinary Days13.So Many Debts to Our Mothers14.Your Angel15.You Are Always. There16.Selfless Sacrifice17.Friendship18.Good Memories and Friendship Renewed19.College Pressure20.A New World Unfolds before Us21.The Wholeness of Life22.May You Success23.Diversity and Excellence Go Hand in Hand24.Stanford Has Changed My Life
社团活动篇流行话题篇
校际交流篇毕业典礼篇初涉社会篇经典重温篇

章节摘录

This joint initiative by faculty on campus and at SLAC will explore fundamental questions about the origins and evolution of the universe. Last June , after several years of discussion and planning by our colleagues in the Schools of Medicine and Engineering , the trustees approved the creation of the new Bioengineering Department. It is the first department at Stanford to be established jointly in two schools , and our colleagues , Professor Scott Delp from Mechanical Engineering and Professor Paul Yock from Medicine , will lead this new department. Although we recognize that there are challenges in bridging disciplines that are culturally and operationally quite different , the opportunity to focus on translating discoveries in the biosciences into clinical advances in human health is too compelling to ignore. At last year's meeting , I stated my belief that the environmental area held great potential for multidisciplinary research and teaching collaborations. While a committee of faculty charged by the provost is actively working on a plan for a broad environmental program , one initiative in this area was launched in November : the Global Climate and Energy Project , or G-CEP for short. G-CEP will explore economically viable methods for the environmentally benign generation of energy , one of the most challenging problems we face both in the developed and developing world. Professor Lynn Orr , after serving as dean of the School of Earth Sciences for eight years , is leading G-CEP , and Professor Chris Edwards from Mechanical Engineering is the deputy director. An international group of companies , representing a wide range of energy producers and users , anticipate investing up to \$ 225 million in this research over the next 10 years.
