<<英语听力入门2000学习指南>>

内容概要

《英语听力入门2000》是供高等院校英语专业学生使用的听力课教材（张民伦主编，华东师范大学出版社出版），该套教材是在原来《英语听力入门》教材的基础上，根据社会的发展和教学改革新形势的要求，引进全新的听力素材，进一步加强对学生认知水平和听力技能的训练。

《英语听力入门2000》的听力材料基本取自于英美原文材料，涉及的知识面相当宽泛，新名词和新用法层出不穷，故许多学生和教师在使用时感到有一定的难度，学习起来也有一定的困难。为帮助广大英语专业学生和英语学习爱好者更好地学习和理解这套教材，我们特编写了其配套材料——《英语听力入门2000学习指南》。

章节摘录

Education has acquired a kind of snob value in modern times. We are no longer content to be honest craftsmen skilled at our work through years of patient practice. Nowadays if we want to get a decent job, we have to have a piece of paper. If we want to get promotion in even a humblest job, we have to obtain a certificate or a diploma first. We may know that we will be better at the job than the man with the paper qualifications, but our experience and practical skills are regarded as relatively unimportant. "Johnson would've been a manager, by now if he'd taken the trouble to get a degree," his colleagues say. "He's a clever man, he could've done anything if he'd had a proper education." I wonder if, as time goes on, we should discover that many people whose practical experience and ability would have been enormously useful to their employers have been rejected on the ground that they are insufficiently qualified. Would it not be better to allow people to become expert in a way most suited to them rather than oblige them to follow a set course of instruction, which may offer no opportunity for them to develop skills in which they would've become expert if left to themselves?
