

## <<偏微分方程的数值近似法>>

### 图书基本信息

书名：<<偏微分方程的数值近似法>>

13位ISBN编号：9787506236171

10位ISBN编号：7506236176

出版时间：1998-3

出版时间：世界图书出版公司

作者：A.Quarteroni

页数：543

字数：24

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<偏微分方程的数值近似法>>

### 内容概要

out their stability and convergence analysis, derive error bounds, and discuss the algorithmic aspects relative to their implementation. A sound balancing of theoretical analysis, description of algorithms and discussion of applications is our primary concern. Many kinds of problems are addressed: linear and nonlinear, steady and time-dependent, having either smooth or non-smooth solutions. Besides model equations, we consider a number of (initial-) boundary value problems of interest in several fields of applications. Part I is devoted to the description and analysis of general numerical methods for the discretization of partial differential equations.

书籍目录

Part I. Basic Concepts and Methods for PDEs ‘ Approximation 1. Introduction 1.1 The Conceptual Path Behind the Approximation 1.2 Preliminary Notation and Function Spaces 1.3 Some Results About Sobolev Spaces 1.4 Comparison Results 2. Numerical Solution of Linear Systems 2.1 Direct Methods 2.2 Generalities on Iterative Methods 2.3 Classical Iterative Methods 2.4 Modern Iterative Methods 2.5 Preconditioning 2.6 Conjugate Gradient and Lanczos like Methods for Non-Symmetric Problems 2.7 The Multi-Grid Method 2.8 Complements 3. Finite Element Approximation 3.1 Triangulation 3.2 Piecewise-Polynomial Subspaces 3.3 Degrees of Freedom and Shape Functions 3.4 The Interpolation Operator 3.5 Projection Operators 3.6 Complements 4. Polynomial Approximation 4.1 Orthogonal Polynomials 4.2 Gaussian Quadrature and Interpolation 4.3 Chebyshev Expansion 4.4 Legendre Expansion 4.5 Two-Dimensional Extensions 4.6 Complements 5. Galerkin, Collocation and Other Methods 5.1 An Abstract Reference Boundary Value Problem 5.2 Galerkin Method 5.3 Petrov-Galerkin Method .....Part . Approximation of Boundary Value Problems 6. Elliptic Problems: Approximation by Galerkin and Collocation Methods 7. Elliptic Problems: Approximation by Mixed and Hybrid Methods 8. Steady Advection-Diffusion-Problems 9. The Stokes Problem 10. The Steady Navier-Stokes Problem Part . Approximation of Initial-Boundary Value Problems 11. Parabolic Problems 12. Unsteady Advection-Diffusion Problems 13. The Unsteady Navier-Stokes Problem 14. Hyperbolic Problems References Subject Index
