

<<基于广义线性模型的多元统计建模>>

图书基本信息

书名：<<基于广义线性模型的多元统计建模>>

13位ISBN编号：9787506238243

10位ISBN编号：7506238241

出版时间：1998-8

出版单位：北京世界图书出版公司

作者：L.Fahrmeir,

页数：425

<<基于广义线性模型的多元统计建模>>

内容概要

本书主要讨论广义线性模型在单变量及多变量回归分析中的应用。书中通过生物学、经济学和社会学等方面多达60余个应用实例，对近年来广义线性模型新的科研成果作了系统介绍，内容新颖，实用性强。

书籍目录

Preface List of Examples List of Figures List of Tables 1 Introduction 1.1 Outline and examples 1.2 Remarks on notation 1.3 Further reading 2 Modelling and analysis of cross-sectional data: a review of univariate generalized linear models 2.1 Univariate generalized linear models 2.2 Likelihood inference 2.3 Some extensions 2.4 Further developments 3 Models for multicategorical responses: multivariate extensions of generalized linear models 3.1 Multicategorical response models 3.2 Models for nominal responses 3.3 Models for ordinal responses 3.4 Statistical inference 3.5 Multivariate models for correlated responses 4 Selecting and checking models 4.1 Variable selection 4.2 Diagnostics 4.3 General tests for misspecification 5 Semi- and nonparametric approaches to regression analysis 5.1 Smoothing techniques for continuous responses 5.2 Kernel smoothing with multicategorical response 5.3 Spline smoothing in generalized linear models 6 Fixed parameter models for time series and longitudinal data 6.1 Time series 6.2 Longitudinal data 7 Random effects models 7.1 Linear random effects models for normal data 8 State space models 9 Survival models Appendix A Appendix B Software for fitting generalized linear models References Author Index Subject index
