

<<运动的量子理论>>

图书基本信息

书名：<<运动的量子理论>>

13位ISBN编号：9787506249638

10位ISBN编号：7506249634

出版时间：2001-4

出版时间：世界图书出版公司(此信息作废)

作者：P.R.Holland

页数：598

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<运动的量子理论>>

内容概要

《运动的量子理论(英文版)》是世界图书出版公司出版的，内容简介：Quantum mechanics and its interptetation、The nature of the problem、The wavefunction and the Schrodinger equition、The completeness assumption、Einstein's point of view、The causal interpretation、Hamilton-Jacobi theory、The need for a common language等。

<<运动的量子理论>>

书籍目录

Preface
1 Quantum mechanics and its interpretation
1.1 The nature of the problem
1.2 The wavefunction and the Schrodinger equation
1.3 The completeness assumption
1.4 Einstein's point of view
1.5 The causal interpretation
2 Hamilton-Jacobi theory
2.1 The need for a common language
2.2 The Hamilton-Jacobi method in classical mechanics
2.3 Properties of the Hamilton-Jacobi function
2.4 The propagation of the S-function
2.5 Classical statistical mechanics
2.6 Classical mechanics as a field theory
2.7 Generalization - internal potentials
3 Elements of the quantum theory of motion
3.1 The basic postulates
3.2 Wave and particle equations of motion
3.3 Properties of the model
3.4 Some properties of the quantum potential
3.5 The relation between particle properties and quantum
3.6 Introduction of probability
3.7 Agreement with the results of quantum mechanics
3.8 The formation of averages
3.9 Conservation law for the field and particle
3.10 Hydrodynamic analogy
3.11 Invariance properties
3.12 Comparison with classical Hamilton-Jacobi theory
4 Simple applications
5 Interference and tunnelling
6 The classical limit
7 Many-body systems
8 Theory of experiments
9 Spin 1/2: the Pauli theory
10 Spin 1/2: the rigid rotator
11 The Einstein-Podolsky-Rosen experiment and nonlocality
Appendix
12 Relativistic quantum theory
References
